

SLS Planar Magnetic Ribbon Drivers

Impulse Response / Compression Driver vs. SLS Audio Ribbon Driver

Conventional 2" Compression Driver

SLS PRD1000 Planar Magnetic Driver

The Impulse Response graphs above further illustrates how the SLS PRD1000 Ribbon Driver exhibits superior transient response compared to a more conventional 2" compression driver. The lack of delayed resonances at higher frequencies present in the PRD1000 contribute largely to its superior performance during fast and dynamic musical passages as well as its increased intelligibility and signal resolution
