C1. Introduction

(1.1) In which language are you submitting your response?

Select from:
☑ English

(1.2) Select the currency used for all financial information disclosed throughout your response.

Select from:
☑ USD

(1.3) Provide an overview and introduction to your organization.

(1.3.2) Organization type

Select from:
☑ Publicly traded organization

(1.3.3) Description of organization

Founded in 1965, Dolby Laboratories is in the business of improving the entertainment experience by inventing and innovating technology that advances audio and video. We enable highly compelling experiences in movies and TV shows, music, sports and more by meeting the needs of content creators, distributors and consumer electronics manufacturers. We have been at the forefront of multiple audio and video revolutions over the last sixty years including the transitions from mono to stereo then surround, analog to digital, and terrestrial broadcasting to streaming. Our strength and durability stem from our ability to combine our expertise in signal processing with our close relationships with artists and other industry experts to continually bring to the creative community technology that allows them to express themselves in new and compelling ways. Dolby is synonymous with high quality entertainment from a consumer perspective and has become critical to makers of consumer electronic devices as our technology is an important component of the creation and delivery of audio and video content. While some of our technology represents relatively elemental functions like audio signal compression that enable playback, we also offer technology that is innovating in emerging categories including spatial audio and high contrast video. We derive the majority of our revenue from licensing audio and video technology to electronics manufacturers, and a lesser portion of our revenue by offering premium audio and video technologies to cinema exhibitors. Dolby is committed to the environment and specifically, the goal of becoming carbon neutral by 2030. We've advanced our long-term strategy, including attaining 100% renewable electricity for our global operations three years ahead of plan and achieving validation of our science-based targets from the Science Based Target initiative (SBTi) in 2023. In 2024, we

prioritized improvements to the company's emissions data internally and across our value chain, identified ways to mitigate emissions in line with our science-based targets, and achieved certified CarbonNeutral business travel (for the fifth consecutive year) through the procurement of high-quality, third-party verified carbon offsets.

(1.4) State the end date of the year for which you are reporting data. For emissions data, indicate whether you will be providing emissions data for past reporting years.

(1.4.1) End date of reporting year

09/27/2024

(1.4.2) Alignment of this reporting period with your financial reporting period

Select from:
☑ Yes

(1.4.3) Indicate if you are providing emissions data for past reporting years

Select from:
☑ Yes

(1.4.4) Number of past reporting years you will be providing Scope 1 emissions data for

Select from:
☑ 2 years

(1.4.5) Number of past reporting years you will be providing Scope 2 emissions data for

Select from:
☑ 2 years

(1.4.6) Number of past reporting years you will be providing Scope 3 emissions data for

Select from:

☑ 2 years

(1.4.1) What is your organization's annual revenue for the reporting period?

$1,273,721,000

(1.5) Provide details on your reporting boundary.

	Is your reporting boundary for your CDP disclosure the same as that used in your financial statements?
	Select from: ☑ Yes

(1.6) Does your organization have an ISIN code or another unique identifier (e.g., Ticker, CUSIP, etc.)?

ISIN code - bond

(1.6.1) Does your organization use this unique identifier?

Select from:
☑ No

ISIN code - equity

(1.6.1) Does your organization use this unique identifier?

Select from:

☑ Yes

(1.6.2) Provide your unique identifier

US25659T1079

CUSIP number

(1.6.1) Does your organization use this unique identifier?

Select from:
☑ No

Ticker symbol

(1.6.1) Does your organization use this unique identifier?

Select from:
☑ Yes

(1.6.2) Provide your unique identifier

DLB

SEDOL code

(1.6.1) Does your organization use this unique identifier?

Select from:
☑ No

LEI number

(1.6.1) Does your organization use this unique identifier?

Select from:

☑ Yes

(1.6.2) Provide your unique identifier

5493003RN4N4ACTUEC28

D-U-N-S number

(1.6.1) Does your organization use this unique identifier?

Select from:

☑ Yes

(1.6.2) Provide your unique identifier

083857383

Other unique identifier

(1.6.1) Does your organization use this unique identifier?

Select from:

☑ No

(1.7) Select the countries/areas in which you operate.

Select all that apply

☑ China	☑ France
☑ India	☑ Poland
☑ Japan	☑ Sweden
☑ Spain	☑ Belgium

☑ Brazil ☑ Germany

☑ Ireland ☑ Republic of Korea

☑ Australia ☑ Hong Kong SAR, China

☑ Singapore ☑ United Arab Emirates

☑ Netherlands ☑ United States of America

☑ Taiwan, China ☑ United Kingdom of Great Britain and Northern Ireland

(1.24) Has your organization mapped its value chain?

(1.24.1) Value chain mapped

Select from:

☑ Yes, we have mapped or are currently in the process of mapping our value chain

(1.24.2) Value chain stages covered in mapping

Select all that apply

☑ Upstream value chain

(1.24.3) Highest supplier tier mapped

Select from:

☑ Tier 1 suppliers

(1.24.4) Highest supplier tier known but not mapped

Select from:

☑ All supplier tiers known have been mapped

(1.24.7) Description of mapping process and coverage

In 2023, Dolby launched a supplier engagement initiative to work with over 60% of our suppliers (by emissions). In doing so, we have gathered better emissions data where possible and most importantly, we are providing tools and resources to enable our suppliers to accelerate their own sustainability maturity. Additionally, as part

of our climate risk assessment work, we have identified the locations of our top suppliers and top customers to enable us to better understand climate risk across our value chain. This work is ongoing, and we plan to continue to map out the locations of our value chain from a climate risk perspective.

(1.24.1) Have you mapped where in your direct operations or elsewhere in your value chain plastics are produced, commercialized, used, and/or disposed of?

(1.24.1.1) Plastics mapping

Select from:
☑ No, and we do not plan to within the next two years

(1.24.1.5) Primary reason for not mapping plastics in your value chain

Select from:
☑ Not an immediate strategic priority

(1.24.1.6) Explain why your organization has not mapped plastics in your value chain

As a company with 93% of its revenue coming from technology licensing arrangements and no direct manufacturing, plastics are not a material issue for Dolby. However, we do recognize the importance of managing plastics and plastic waste and addressing this within our offices and through our waste disposal management, including recycling programs.

C2. Identification, assessment, and management of dependencies, impacts, risks, and opportunities

(2.1) How does your organization define short-, medium-, and long-term time horizons in relation to the identification, assessment, and management of your environmental dependencies, impacts, risks, and opportunities?

Short-term

(2.1.1) From (years)

1

(2.1.3) To (years)

2

(2.1.4) How this time horizon is linked to strategic and/or financial planning

Generally speaking, Dolby defines a short-term time horizon as spanning from 12-18 months. This applies to the business in broad terms and is not specific to climate-related risks and opportunities. We will define time horizons in the context of climate risks and opportunities in the future. Dolby has conducted a climate risk assessment aligned with the recommendations of the Task Force on Climate-related Financial Disclosures (TCFD). At this stage, we are in the process of evaluating whether the identified climate-related risks and opportunities are substantive enough to have a material financial or strategic impact on our business. As this evaluation progresses, we intend to integrate any material findings into our enterprise risk assessment process to ensure a structured and proactive approach to managing climate-related risks and opportunities.

Medium-term

(2.1.1) From (years)

2

(2.1.3) To (years)

5

(2.1.4) How this time horizon is linked to strategic and/or financial planning

Generally speaking, Dolby defines a medium-term time horizon as spanning from 2-5 years. This applies to the business in broad terms and is not specific to climate-related risks and opportunities. We will define time horizons in the context of climate risks and opportunities in the future. Dolby has conducted a climate risk assessment aligned with the recommendations of the Task Force on Climate-related Financial Disclosures (TCFD). At this stage, we are in the process of evaluating whether the identified climate-related risks and opportunities are substantive enough to have a material financial or strategic impact on our business. As this evaluation progresses, we intend to integrate any material findings into our enterprise risk assessment process to ensure a structured and proactive approach to managing climate-related risks and opportunities.

Long-term

(2.1.1) From (years)

(2.1.2) Is your long-term time horizon open ended?

Select from:
☑ No

(2.1.3) To (years)

15

(2.1.4) How this time horizon is linked to strategic and/or financial planning

Generally speaking, Dolby defines a long-term time horizon as spanning from 5–15 years. This applies to the business in broad terms and is not specific to climate-related risks and opportunities. We will define time horizons in the context of climate risks and opportunities in the future. Dolby has conducted a climate risk assessment aligned with the recommendations of the Task Force on Climate-related Financial Disclosures (TCFD). At this stage, we are in the process of evaluating whether the identified climate-related risks and opportunities are substantive enough to have a material financial or strategic impact on our business. As this evaluation progresses, we intend to integrate any material findings into our enterprise risk assessment process to ensure a structured and proactive approach to managing climate-related risks and opportunities.

(2.2) Does your organization have a process for identifying, assessing, and managing environmental dependencies and/or impacts?

(2.2.1) Process in place

Select from:
☑ Yes

(2.2.2) Dependencies and/or impacts evaluated in this process

Select from:
☑ Impacts only

(2.2.4) Primary reason for not evaluating dependencies and/or impacts

Select from:
☑ Not an immediate strategic priority

(2.2.5) Explain why you do not evaluate dependencies and/or impacts and describe any plans to do so in the future

As a company with 93% of its revenue coming from technology licensing arrangements and no direct manufacturing, we have very few direct dependencies on nature. That said, we recognize the value that nature brings to society and the importance of preserving nature around the world. Currently, Dolby invests in carbon offset projects that are protecting and restoring nature as part of our commitment to certifying our business travel as CarbonNeutral each year. You can learn more about the carbon projects that Dolby has participated in at: https://www.dolby.com/siteassets/about/corporate/sustainability-at-dolby/sustainability-reports/dolby-ab1305-reporting-updated-may-12-2025.pdf

(2.2.1) Does your organization have a process for identifying, assessing, and managing environmental risks and/or opportunities?

	Process in place	Risks and/or opportunities evaluated in this process	Is this process informed by the dependencies and/or impacts process?
	Select from: ☑ Yes	*Select from:* ☑ Both risks and opportunities	*Select from:* ☑ Yes

(2.2.2) Provide details of your organization's process for identifying, assessing, and managing environmental dependencies, impacts, risks, and/or opportunities.

Row 1

(2.2.2.1) Environmental issue

Select all that apply
☑ Climate change

(2.2.2.2) Indicate which of dependencies, impacts, risks, and opportunities are covered by the process for this environmental issue

Select all that apply

☑ Risks

☑ Opportunities

(2.2.2.3) Value chain stages covered

Select all that apply

☑ Direct operations

☑ Upstream value chain

☑ Downstream value chain

(2.2.2.4) Coverage

Select from:

☑ Full

(2.2.2.5) Supplier tiers covered

Select all that apply

☑ Tier 1 suppliers

(2.2.2.7) Type of assessment

Select from:

☑ Qualitative and quantitative

(2.2.2.8) Frequency of assessment

Select from:

☑ Annually

(2.2.2.9) Time horizons covered

Select all that apply
☑ Short-term
☑ Medium-term
☑ Long-term

(2.2.2.10) Integration of risk management process

Select from:
☑ Integrated into multi-disciplinary organization-wide risk management process

(2.2.2.11) Location-specificity used

Select all that apply
☑ Site-specific

(2.2.2.12) Tools and methods used

International methodologies and standards
☑ IPCC Climate Change Projections

Other
☑ External consultants
☑ Internal company methods
☑ Scenario analysis

(2.2.2.13) Risk types and criteria considered

Acute physical
☑ Cyclones, hurricanes, typhoons
☑ Drought

☑ Flood (coastal, fluvial, pluvial, ground water)

☑ Heat waves

☑ Wildfires

Chronic physical

☑ Changing temperature (air, freshwater, marine water)

☑ Heat stress

☑ Increased severity of extreme weather events

☑ Water stress

Policy

☑ Carbon pricing mechanisms

Market

☑ Changing customer behavior

Reputation

☑ Increased partner and stakeholder concern and partner and stakeholder negative feedback

☑ Negative press coverage related to support of projects or activities with negative impacts on the environment (e.g. GHG emissions, deforestation & conversion, water stress)

Technology

☑ Transition to lower emissions technology and products

Liability

☑ Non-compliance with regulations

(2.2.2.14) Partners and stakeholders considered

Select all that apply

☑ Customers

☑ Employees

☑ Suppliers

(2.2.2.15) Has this process changed since the previous reporting year?

Select from:
☑ No

(2.2.2.16) Further details of process

Dolby is continuing to develop processes for assessing and managing climate-related transition and physical risks and opportunities that could have a substantive financial or strategic impact. The climate-related risks that we currently account for are managed by teams that participate in the annual enterprise risk assessment that is conducted by our Internal Audit Department. Dolby conducts site-level hazard vulnerability analyses in collaboration with senior leadership of lines of business to document key risks and continuity strategies to operations. Risks are identified by assessing probability alongside severity and then prioritized. This risk evaluation considers climate-related hazard types, such as floods, wildfires, inclement weather, and temperature extremes, among many other hazard types. Potential operational risks associated with climate change are mitigated through the implementation of physical and operational disaster recovery, crisis management, and business continuity planning. The Audit Committee oversees Dolby's annual enterprise risk assessment, which is conducted by our Internal Audit Department. The annual enterprise risk assessment reviews the primary risks facing the company and Dolby's associated risk mitigation measures. In addition, the Audit Committee discusses other risk assessment and risk management policies of the company periodically with management. In 2024, we completed our climate risk and opportunity assessment in alignment with TCFD, including a qualitative and quantitative assessment of risks and opportunities and scenario analysis on our physical risks. We continue to work to understand the financial impacts related to the risks and opportunities identified so that we can determine whether or not they are substantive for Dolby.

(2.2.7) Are the interconnections between environmental dependencies, impacts, risks and/or opportunities assessed?

(2.2.7.1) Interconnections between environmental dependencies, impacts, risks and/or opportunities assessed

Select from:
☑ No

(2.2.7.3) Primary reason for not assessing interconnections between environmental dependencies, impacts, risks and/or opportunities

Select from:
☑ Not an immediate strategic priority

(2.2.7.4) Explain why you do not assess the interconnections between environmental dependencies, impacts, risks and/or opportunities

Dolby has not yet conducted a nature assessment to determine our dependencies. We are not directly dependent on ecosystem services, such as high-quality water. For this reason, it has not been considered an immediate strategic priority; however, we are planning to evaluate this in the future and when we do so, we will complete the assessment in alignment with the best practice.

(2.3) Have you identified priority locations across your value chain?

(2.3.1) Identification of priority locations

Select from:
☑ Yes, we are currently in the process of identifying priority locations

(2.3.2) Value chain stages where priority locations have been identified

Select all that apply
☑ Direct operations

(2.3.3) Types of priority locations identified

Sensitive locations
☑ Areas of limited water availability, flooding, and/or poor quality of water

Locations with substantive dependencies, impacts, risks, and/or opportunities
☑ Other location with substantive nature-related dependencies, impacts, risks, and/or opportunities, please specify :We reviewed our locations through the lens of climate change and the associated risks, specifically the physical risks recommended in the TCFD framework.

(2.3.4) Description of process to identify priority locations

As part of Dolby's climate risk assessment, we completed a formal climate location scan of our office locations around the world as well as locations of our key customers and suppliers. In doing so, we identified locations that are expected to be impacted the most by the physical risks associated with climate change (in

accordance with the risks outlined by TCFD). As this analysis continues to progress, we are working to incorporate the findings into our broader enterprise risk management and location planning processes to ensure climate-related risks are appropriately prioritized and addressed.

(2.3.5) Will you be disclosing a list/spatial map of priority locations?

Select from:

☑ No, we do not have a list/geospatial map of priority locations

(2.4) How does your organization define substantive effects on your organization?

Risks

(2.4.1) Type of definition

Select all that apply

☑ Qualitative

(2.4.6) Metrics considered in definition

Select all that apply

☑ Frequency of effect occurring

☑ Time horizon over which the effect occurs

☑ Likelihood of effect occurring

(2.4.7) Application of definition

Dolby defines substantive financial impact on the business as a level that would have a material impact to our key stakeholders (e.g., shareholders, customers, partners, employees, etc.). In some cases, a substantive financial impact could be large dollar amounts (e.g., 10s of millions - 100s of millions) or small dollar amounts and is also dependent on the nature of impact. Substantive strategic impact would be the result of situations that impact our ability to achieve key medium-to long-term objectives, which could be both internal factors (missing a key goal) or external factors (shift in market dynamics).

Opportunities

(2.4.1) Type of definition

Select all that apply

☑ Qualitative

(2.4.6) Metrics considered in definition

Select all that apply

☑ Frequency of effect occurring

☑ Time horizon over which the effect occurs

☑ Likelihood of effect occurring

(2.4.7) Application of definition

Dolby defines substantive financial impact on the business as a level that would have a material impact to our key stakeholders (e.g., shareholders, customers, partners, employees, etc.). In some cases, a substantive financial impact could be large dollar amounts (e.g., 10s of millions - 100s of millions) or small dollar amounts and is also dependent on the nature of impact. Substantive strategic impact would be the result of situations that impact our ability to achieve key medium-to long-term objectives, which could be both internal factors (missing a key goal) or external factors (shift in market dynamics).

(2.5) Does your organization identify and classify potential water pollutants associated with its activities that could have a detrimental impact on water ecosystems or human health?

(2.5.1) Identification and classification of potential water pollutants

Select from:

☑ No, we do not identify and classify our potential water pollutants

(2.5.3) Please explain

As a company with 93% of its revenue coming from technology licensing arrangements and no direct manufacturing, we do not engage in activities associated with water pollutants.

C3. Disclosure of risks and opportunities

(3.1) Have you identified any environmental risks which have had a substantive effect on your organization in the reporting year, or are anticipated to have a substantive effect on your organization in the future?

Climate change

(3.1.1) Environmental risks identified

Select from:
☑ No

(3.1.2) Primary reason why your organization does not consider itself to have environmental risks in your direct operations and/or upstream/downstream value chain

Select from:
☑ Evaluation in progress

(3.1.3) Please explain

We are in the process of completing our climate risk and opportunity assessment in alignment with TCFD. To date, we have completed the qualitative and quantitative assessment of risks and opportunities and the related scenario analysis. This will enable us to determine whether any of the identified risks or opportunities are substantive now or in the future. Certain environmental risks have been identified as part of our assessment, but we are not including them in these responses as the question specifically asks only for those that will have a substantive effect, which we have yet to determine.

Water

(3.1.1) Environmental risks identified

Select from:
☑ No

(3.1.2) Primary reason why your organization does not consider itself to have environmental risks in your direct operations and/or upstream/downstream value chain

Select from:

☑ Environmental risks exist, but none with the potential to have a substantive effect on our organization

(3.1.3) Please explain

As a company with 93% of its revenue coming from technology licensing arrangements and no direct manufacturing, water is not a material issue for Dolby; however, we recognize the importance of water conservation and work to conserve water at our corporate offices around the world.

Plastics

(3.1.1) Environmental risks identified

Select from:

☑ No

(3.1.2) Primary reason why your organization does not consider itself to have environmental risks in your direct operations and/or upstream/downstream value chain

Select from:

☑ Environmental risks exist, but none with the potential to have a substantive effect on our organization

(3.1.3) Please explain

As a company with 93% of its revenue coming from technology licensing arrangements and no direct manufacturing, plastics are not a material issue for Dolby. However, we do recognize the importance of managing plastics and plastic waste and address this within our corporate offices around the world through our waste disposal management, including recycling programs.

(3.3) In the reporting year, was your organization subject to any fines, enforcement orders, and/or other penalties for water-related regulatory violations?

	Water-related regulatory violations	Comment
	Select from: ☑ No	We were not subject to any fines, enforcement orders, and/or other penalties for water-related regulatory violations.

[Fixed row]

(3.5) Are any of your operations or activities regulated by a carbon pricing system (i.e. ETS, Cap & Trade or Carbon Tax)?

Select from:
☑ No, and we do not anticipate being regulated in the next three years

(3.6) Have you identified any environmental opportunities which have had a substantive effect on your organization in the reporting year, or are anticipated to have a substantive effect on your organization in the future?

Climate change

(3.6.1) Environmental opportunities identified

Select from:
☑ No

(3.6.2) Primary reason why your organization does not consider itself to have environmental opportunities

Select from:
☑ Evaluation in progress

(3.6.3) Please explain

We are in the process of completing our climate risk and opportunity assessment in alignment with TCFD. To date, we have completed the qualitative and quantitative assessment of risks and opportunities and the related scenario analysis. This will enable us to determine whether any of the identified risks or opportunities are substantive now or in the future. Certain environmental opportunities have been identified as part of our assessment, but we are not including them in these responses as the question specifically asks only for those that will have a substantive effect, which we have yet to determine.

Water

(3.6.1) Environmental opportunities identified

Select from:
☑ No

(3.6.2) Primary reason why your organization does not consider itself to have environmental opportunities

Select from:
☑ Not an immediate strategic priority

(3.6.3) Please explain

As a company with 93% of its revenue coming from technology licensing arrangements and no direct manufacturing, water is not a material issue for Dolby; however, we recognize the importance of water conservation and work to conserve water at our corporate offices around the world.

C4. Governance

(4.1) Does your organization have a board of directors or an equivalent governing body?

(4.1.1) Board of directors or equivalent governing body

Select from:
☑ Yes

(4.1.2) Frequency with which the board or equivalent meets

☑ Quarterly

(4.1.3) Types of directors your board or equivalent is comprised of

Select all that apply

☑ Executive directors or equivalent

☑ Non-executive directors or equivalent

☑ Independent non-executive directors or equivalent

(4.1.4) Board diversity and inclusion policy

Select from:

☑ Yes, and it is publicly available

(4.1.5) Briefly describe what the policy covers

In its evaluation of director candidates, including the members of the Board of Directors (the "Board") of Dolby Laboratories, Inc. eligible for re-election, the Nominating and Governance Committee will consider the following: (i) the current size and composition of our Board and the needs of our Board, and the respective committees of our Board; (ii) without assigning any particular weighting or priority to any of these factors, such factors as character, integrity, judgment, independence, areas of expertise, corporate experience, length of service, potential conflicts of interest, other commitments, and diversity with respect to experience, perspective, professional background, education, race, ethnicity, gender, age and geography, as well as other individual qualities and attributes that contribute to the total mix of viewpoints and experience represented on the Board; and (iii) other factors that the committee may consider appropriate.

(4.1.6) Attach the policy (optional)

2025 (FY24) Dolby Proxy Statement.pdf

(4.1.1) Is there board-level oversight of environmental issues within your organization?

Climate change

(4.1.1.1) Board-level oversight of this environmental issue

Select from:

☑ Yes

Water

(4.1.1.1) Board-level oversight of this environmental issue

Select from:

☑ No, and we do not plan to within the next two years

(4.1.1.2) Primary reason for no board-level oversight of this environmental issue

Select from:

☑ Not an immediate strategic priority

(4.1.1.3) Explain why your organization does not have board-level oversight of this environmental issue

As a company with 93% of its revenue coming from technology licensing arrangements and no direct manufacturing, water is not a material issue for Dolby; however, we recognize the importance of water conservation and work to conserve water at our corporate offices around the world.

Biodiversity

(4.1.1.1) Board-level oversight of this environmental issue

Select from:

☑ No, and we do not plan to within the next two years

(4.1.1.2) Primary reason for no board-level oversight of this environmental issue

Select from:

☑ Not an immediate strategic priority

(4.1.1.3) Explain why your organization does not have board-level oversight of this environmental issue

As a company with 93% of its revenue coming from technology licensing arrangements and no direct manufacturing, we have very few direct dependencies on nature. That said, we recognize the value that nature brings to society and the importance of preserving nature around the world. Currently, Dolby invests in carbon offset projects that are protecting and restoring nature as part of our commitment to certifying our business travel as CarbonNeutral each year. You can learn more about the carbon projects that Dolby has participated in at: https://www.dolby.com/siteassets/about/corporate/sustainability-at-dolby/sustainability-reports/dolby-ab1305-reporting-updated-may-12-2025.pdf Additionally, Dolby provides grant funding to organizations that promote biodiversity and environmental sustainability.

(4.1.2) Identify the positions (do not include any names) of the individuals or committees on the board with accountability for environmental issues and provide details of the board's oversight of environmental issues.

Climate change

(4.1.2.1) Positions of individuals or committees with accountability for this environmental issue

Select all that apply
☑ Other C-Suite Officer
☑ Board-level committee
☑ Other, please specify :Dolby's People and Places Team, Legal, Finance, and Ethics and Compliance

(4.1.2.2) Positions' accountability for this environmental issue is outlined in policies applicable to the board

Select from:
☑ Yes

(4.1.2.3) Policies which outline the positions' accountability for this environmental issue

Select all that apply
☑ Board mandate

(4.1.2.4) Frequency with which this environmental issue is a scheduled agenda item

Select from:
☑ Scheduled agenda item in some board meetings – at least annually

(4.1.2.5) Governance mechanisms into which this environmental issue is integrated

Select all that apply

☑ Reviewing and guiding annual budgets

☑ Overseeing the setting of corporate targets

☑ Approving corporate policies and/or commitments

☑ Approving and/or overseeing employee incentives

☑ Overseeing and guiding major capital expenditures

☑ Monitoring the implementation of a climate transition plan

☑ Overseeing and guiding the development of a business strategy

(4.1.2.7) Please explain

The company's Board of Directors' Nominating and Governance Committee (NGC) oversees Environmental, Social, and Governance (ESG) matters, including environmental sustainability and climate-related issues. The NGC Committee is supported in these efforts by the Executive Leadership Team (ELT), as well as the People & Places, Finance, Legal, and Ethics & Compliance teams. Dolby is working toward our goal of reaching carbon neutrality by 2030 with the review and oversight of the Board's NGC. Learn more about the Committees of Dolby's Board of Directors at: https://investor.dolby.com/governance/Governance-Overview/default.aspx

(4.2) Does your organization's board have competency on environmental issues?

Climate change

(4.2.1) Board-level competency on this environmental issue

Select from:

☑ Yes

(4.2.2) Mechanisms to maintain an environmentally competent board

Select all that apply

☑ Consulting regularly with an internal, permanent, subject-expert working group

☑ Having at least one board member with expertise on this environmental issue

(4.2.3) Environmental expertise of the board member

Experience
☑ Active member of an environmental committee or organization

Water

(4.2.1) Board-level competency on this environmental issue

Select from:
☑ No, and we do not plan to within the next two years

(4.2.4) Primary reason for no board-level competency on this environmental issue

Select from:
☑ Not an immediate strategic priority

(4.2.5) Explain why your organization does not have a board with competence on this environmental issue

As a company with 93% of its revenue coming from technology licensing arrangements and no direct manufacturing, water is not a material issue for Dolby; however, we recognize the importance of water conservation and work to conserve water at our corporate offices around the world.

(4.3) Is there management-level responsibility for environmental issues within your organization?

Climate change

(4.3.1) Management-level responsibility for this environmental issue

Select from:
☑ Yes

Water

(4.3.1) Management-level responsibility for this environmental issue

(4.3.2) Primary reason for no management-level responsibility for environmental issues

Select from:

☑ Not an immediate strategic priority

(4.3.3) Explain why your organization does not have management-level responsibility for environmental issues

As a company with 93% of its revenue coming from technology licensing arrangements and no direct manufacturing, water is not a material issue for Dolby; however, we recognize the importance of water conservation and work to conserve water at our corporate offices around the world.

Biodiversity

(4.3.1) Management-level responsibility for this environmental issue

Select from:

☑ No, and we do not plan to within the next two years

(4.3.2) Primary reason for no management-level responsibility for environmental issues

Select from:

☑ Not an immediate strategic priority

(4.3.3) Explain why your organization does not have management-level responsibility for environmental issues

As a company with 93% of its revenue coming from technology licensing arrangements and no direct manufacturing, we have very few direct dependencies on nature. That said, we recognize the value that nature brings to society and the importance of preserving nature around the world. Currently, Dolby invests in carbon offset projects that are protecting and restoring nature as part of our commitment to certifying our business travel as CarbonNeutral each year. You can learn more about the carbon projects that Dolby has participated in at: https://www.dolby.com/siteassets/about/corporate/sustainability-at-dolby/sustainability-reports/dolby-ab1305-reporting-updated-may-12-2025.pdf Additionally, Dolby provides grant funding to organizations that promote biodiversity and environmental sustainability.

(4.3.1) Provide the highest senior management-level positions or committees with responsibility for environmental issues (do not include the names of individuals).

Climate change

(4.3.1.1) Position of individual or committee with responsibility

Executive level
☑ Other C-Suite Officer, please specify :Chief People Officer

(4.3.1.2) Environmental responsibilities of this position

Dependencies, impacts, risks and opportunities
☑ Assessing environmental dependencies, impacts, risks, and opportunities

Policies, commitments, and targets
☑ Monitoring compliance with corporate environmental policies and/or commitments
☑ Measuring progress towards environmental corporate targets
☑ Measuring progress towards environmental science-based targets
☑ Setting corporate environmental targets

Strategy and financial planning
☑ Implementing a climate transition plan environmental issues
☑ Conducting environmental scenario analysis
☑ Managing annual budgets related to environmental issues
☑ Developing a business strategy which considers environmental issues
☑ Managing environmental reporting, audit, and verification processes

☑ Managing major capital and/or operational expenditures relating to

(4.3.1.4) Reporting line

Select from:

☑ Reports to the Chief Executive Officer (CEO)

(4.3.1.5) Frequency of reporting to the board on environmental issues

Select from:
☑ Half-yearly

(4.3.1.6) Please explain

The Senior Vice President & Chief People Officer is responsible for the company's People & Places function, which includes all aspects of Social Impact & Sustainability, Human Resources, Wellbeing, Diversity, Inclusion & Belonging, and Places (Facilities management including location strategy, energy, waste, water, etc.). They report directly to the CEO and serve on the company's Executive Leadership Team (ELT). They directly manage the Senior Director of Social Impact & Sustainability and oversee the company's Sustainability Initiative, which includes climate-related initiatives and reporting. They are regularly briefed (at least bi-monthly) on climate-related risks and opportunities and approve efforts and initiatives developed to address them. The Senior Vice President & Chief People Officer provides weekly updates to our ELT and includes ESG, and sustainability updates as needed. The Senior Vice President & Chief People Officer has the highest-level management responsibility for ESG and Sustainability.

(4.5) Do you provide monetary incentives for the management of environmental issues, including the attainment of targets?

Climate change

(4.5.1) Provision of monetary incentives related to this environmental issue

Select from:
☑ Yes

(4.5.2) % of total C-suite and board-level monetary incentives linked to the management of this environmental issue

0

(4.5.3) Please explain

Dolby is aware of the increased focus on incentives for the management of climate-related issues. Currently, incentives for Dolby's Director of Sustainability & ESG are linked to climate and sustainability progress. We aim to consider introducing additional incentives related to our climate targets in the future.

Water

(4.5.1) Provision of monetary incentives related to this environmental issue

Select from:
☑ No, and we do not plan to introduce them in the next two years

(4.5.3) Please explain

As a company with 93% of its revenue coming from technology licensing arrangements and no direct manufacturing, water is not a material issue for Dolby; however, we recognize the importance of water conservation and work to conserve water at our corporate offices around the world.

(4.5.1) Provide further details on the monetary incentives provided for the management of environmental issues (do not include the names of individuals).

Climate change

(4.5.1.1) Position entitled to monetary incentive

Senior-mid management
☑ Environment/Sustainability manager

(4.5.1.2) Incentives

Select all that apply
☑ Bonus - % of salary
☑ Promotion
☑ Salary increase

(4.5.1.3) Performance metrics

Targets

☑ Progress towards environmental targets

☑ Achievement of environmental targets

(4.5.1.4) Incentive plan the incentives are linked to

Select from:

☑ Both Short-Term and Long-Term Incentive Plan, or equivalent

(4.5.1.5) Further details of incentives

The Director of Sustainability & ESG position was created in 2022 to be responsible for driving Dolby's sustainability efforts, including the achievement of its science-based targets. The role manages both environmental sustainability and ESG reporting at Dolby.

(4.5.1.6) How the position's incentives contribute to the achievement of your environmental commitments and/or climate transition plan

This position is dedicated to Dolby's sustainability strategy, goals and progress toward those goals; therefore, the incentives are 100% aligned to these commitments.

(4.6) Does your organization have an environmental policy that addresses environmental issues?

	Does your organization have any environmental policies?
	Select from: ☑ Yes

(4.6.1) Provide details of your environmental policies.

Row 1

(4.6.1.1) Environmental issues covered

Select all that apply

☑ Climate change

(4.6.1.2) Level of coverage

Select from:

☑ Organization-wide

(4.6.1.3) Value chain stages covered

Select all that apply

☑ Direct operations

(4.6.1.4) Explain the coverage

Dolby's Environmental Policy is strictly related to our environmental efforts and initiatives. Therefore, it does not address topics such as human rights. Our Business Partner Code of Conduct and Ethics is very comprehensive when it comes to the other topics mentioned in the "Environmental policy content" list and can be found online at: https://s27.q4cdn.com/365963565/files/doc_downloads/governance/2022/07/DOLBY_BPCOC_FINAL_062322.pdf Additionally, our corporate governance documents can be found online at: https://investor.dolby.com/governance/Governance-Overview/default.aspx#governance-documents, our environmental commitment can be found online at: https://www.dolby.com/about/corporate/sis/environmental-commitment/, and see many other ESG Reporting related Disclosures here including our sustainability reports: https://www.dolby.com/about/corporate/sis/past-reports/

(4.6.1.5) Environmental policy content

Environmental commitments

☑ Commitment to comply with regulations and mandatory standards

☑ Commitment to take environmental action beyond regulatory compliance

☑ Commitment to stakeholder engagement and capacity building on environmental issues

Climate-specific commitments

☑ Commitment to 100% renewable energy

Additional references/Descriptions

☑ Description of environmental requirements for procurement

(4.6.1.6) Indicate whether your environmental policy is in line with global environmental treaties or policy goals

Select all that apply

☑ Yes, in line with the Paris Agreement

(4.6.1.7) Public availability

Select from:

☑ Publicly available

(4.6.1.8) Attach the policy

dolby-global-environmental-policy.pdf

(4.10) Are you a signatory or member of any environmental collaborative frameworks or initiatives?

(4.10.1) Are you a signatory or member of any environmental collaborative frameworks or initiatives?

Select from:

☑ Yes

(4.10.2) Collaborative framework or initiative

Select all that apply

☑ Science-Based Targets Initiative (SBTi)

☑ Task Force on Climate-related Financial Disclosures (TCFD)

☑ UN Global Compact

☑ Other, please specify :EPA Green Power Partnership

(4.10.3) Describe your organization's role within each framework or initiative

Dolby achieved validation of its science-based targets from the Science Based Target initiative (SBTi) in 2023. Historically, Dolby was a TCFD supporter and believes the TCFD recommendations provide a useful framework to increase transparency on climate-related risks and opportunities within financial markets. We are continuing our work around climate risk and opportunity in alignment with TCFD (now incorporated into the IFRS Foundation) and plan to publish a report to comply with California's Bill 261 or the Climate-Related Financial Risk Act. Dolby is a signatory to the UN Global Compact, our member profile can be found at: https://unglobalcompact.org/what-is-gc/participants/163591-Dolby-Laboratories-Inc-. Additionally, we are members of the EPA's Green Power Partnership (GPP), our member profile can be found at: https://www.epa.gov/greenpower/meet-our-partners?partnerdolbylaboratoriesinc. With Dolby's commitment to 100% renewable electricity, we align with EPA's GPP on their goal of advancing the American market for green power and reducing air emissions and pollution.

(4.11) In the reporting year, did your organization engage in activities that could directly or indirectly influence policy, law, or regulation that may (positively or negatively) impact the environment?

(4.11.1) External engagement activities that could directly or indirectly influence policy, law, or regulation that may impact the environment

Select all that apply
☑ Yes, we engaged indirectly through, and/or provided financial or in-kind support to a trade association or other intermediary organization or individual whose activities could influence policy, law, or regulation

(4.11.2) Indicate whether your organization has a public commitment or position statement to conduct your engagement activities in line with global environmental treaties or policy goals

Select from:
☑ No, and we do not plan to have one in the next two years

(4.11.5) Indicate whether your organization is registered on a transparency register

Select from:
☑ Unknown

(4.11.8) Describe the process your organization has in place to ensure that your external engagement activities are consistent with your environmental commitments and/or transition plan

At Dolby, environmental sustainability is a growing priority, and we continue to strengthen our initiatives to combat climate change and its impacts on our planet, people, and communities. While we do not currently have processes in place to ensure that external engagement activities are consistent with our overall climate strategy, we plan to develop this area further as our climate strategy evolves and we embed sustainability more deeply throughout the organization.

(4.11.2) Provide details of your indirect engagement on policy, law, or regulation that may (positively or negatively) impact the environment through trade associations or other intermediary organizations or individuals in the reporting year.

Row 1

(4.11.2.1) Type of indirect engagement

Select from:
☑ Indirect engagement via a trade association

(4.11.2.4) Trade association

North America
☑ US Chamber of Commerce

(4.11.2.5) Environmental issues relevant to the policies, laws, or regulations on which the organization or individual has taken a position

Select all that apply
☑ Climate change

(4.11.2.6) Indicate whether your organization's position is consistent with the organization or individual you engage with

Select from:
☑ Mixed

(4.11.2.7) Indicate whether your organization attempted to influence the organization or individual's position in the reporting year

Select from:

☑ No, we did not attempt to influence their position

(4.11.2.8) Describe how your organization's position is consistent with or differs from the organization or individual's position, and any actions taken to influence their position

The US Chamber of Commerce is the world's largest business organization. The Chamber advocates for policies that help businesses create jobs and grow the economy. The Chamber's position on policies, laws or regulations that impact the climate have been mixed. For more information, see https://www.uschamber.com. Dolby's aim in being a member of the U.S. Chamber of Commerce is to have access to the latest information on domestic and global issues that impact our business, benefit from the analysis and expertise of top policy and legal experts in the field and be a part of the largest community of business leaders in the world. Dolby is not seeking to influence their position at this time. Dolby's sustainability goals and commitments are in alignment with the Paris Agreement. Specifically, we have science-based targets in alignment with the Science Based Targets initiative (SBTi) criteria version 5.0. Dolby does not publicly disclose the funding figures of its associations or membership organizations.

(4.11.2.9) Funding figure your organization provided to this organization or individual in the reporting year (currency)

0

(4.11.2.11) Indicate if you have evaluated whether your organization's engagement is aligned with global environmental treaties or policy goals

Select from:

☑ No, we have not evaluated

Row 2

(4.11.2.1) Type of indirect engagement

Select from:

☑ Indirect engagement via a trade association

(4.11.2.4) Trade association

North America

☑ Other trade association in North America, please specify :Bay Area Council

(4.11.2.5) Environmental issues relevant to the policies, laws, or regulations on which the organization or individual has taken a position

Select all that apply

☑ Climate change

☑ Water

(4.11.2.6) Indicate whether your organization's position is consistent with the organization or individual you engage with

Select from:

☑ Consistent

(4.11.2.7) Indicate whether your organization attempted to influence the organization or individual's position in the reporting year

Select from:

☑ No, we did not attempt to influence their position

(4.11.2.8) Describe how your organization's position is consistent with or differs from the organization or individual's position, and any actions taken to influence their position

Dolby supports the Bay Area Councils commitment to working with the public and community leaders to keep the Bay Area the most innovative, globally competitive, inclusive, and sustainable region in the world. The Council's lead priorities are Public Safety, Homelessness, Housing Transportation, and Water & Climate Resilience. The Bay Area Council is made up of more than 330 of the largest employers in the Bay Area region and has been at the intersection of business and civic leadership since 1945. Dolby does not publicly disclose the funding figures of its associations or membership organizations.

(4.11.2.9) Funding figure your organization provided to this organization or individual in the reporting year (currency)

0

(4.11.2.11) Indicate if you have evaluated whether your organization's engagement is aligned with global environmental treaties or policy goals

Select from:
☑ Yes, we have evaluated, and it is aligned

(4.11.2.12) Global environmental treaties or policy goals aligned with your organization's engagement on policy, law or regulation

Select all that apply
☑ Paris Agreement

Row 3

(4.11.2.1) Type of indirect engagement

Select from:
☑ Indirect engagement via other intermediary organization or individual

(4.11.2.2) Type of organization or individual

Select from:
☑ Non-Governmental Organization (NGO) or charitable organization

(4.11.2.3) State the organization or position of individual

Business Council on Climate Change (BC3) is a membership-driven nonprofit organization dedicated to incubating, scaling, and sharing world-leading solutions to address climate change.

(4.11.2.5) Environmental issues relevant to the policies, laws, or regulations on which the organization or individual has taken a position

Select all that apply

☑ Climate change

(4.11.2.6) Indicate whether your organization's position is consistent with the organization or individual you engage with

Select from:

☑ Consistent

(4.11.2.7) Indicate whether your organization attempted to influence the organization or individual's position in the reporting year

Select from:

☑ No, we did not attempt to influence their position

(4.11.2.8) Describe how your organization's position is consistent with or differs from the organization or individual's position, and any actions taken to influence their position

Dolby supports BC3 and their efforts, and we benefit from local business collaboration and shared resources in the development of climate solutions that have positive impacts in our local business community. BC3 is a resource for businesses to incubate, scale, and share climate solutions, as well as work together on a new model for local climate action. Dolby utilizes its membership in BC3 to accelerate and build upon our environmental commitments. Learn more about this organization at: https://www.bc3sfbay.org/. Dolby does not publicly disclose the funding figures of its associations or membership organizations.

(4.11.2.9) Funding figure your organization provided to this organization or individual in the reporting year (currency)

0

(4.11.2.11) Indicate if you have evaluated whether your organization's engagement is aligned with global environmental treaties or policy goals

Select from:

☑ Yes, we have evaluated, and it is aligned

(4.11.2.12) Global environmental treaties or policy goals aligned with your organization's engagement on policy, law or regulation

Select all that apply

☑ Paris Agreement

Row 4

(4.11.2.1) Type of indirect engagement

Select from:

☑ Indirect engagement via other intermediary organization or individual

(4.11.2.2) Type of organization or individual

Select from:

☑ University or other educational institution

(4.11.2.3) State the organization or position of individual

Boston College Center for Corporate Citizenship helps organizations align ESG objectives and business goals to create a more sustainable and prosperous future for all.

(4.11.2.5) Environmental issues relevant to the policies, laws, or regulations on which the organization or individual has taken a position

Select all that apply

☑ Climate change

(4.11.2.6) Indicate whether your organization's position is consistent with the organization or individual you engage with

Select from:

☑ Consistent

(4.11.2.7) Indicate whether your organization attempted to influence the organization or individual's position in the reporting year

Select from:

☑ No, we did not attempt to influence their position

(4.11.2.8) Describe how your organization's position is consistent with or differs from the organization or individual's position, and any actions taken to influence their position

Dolby supports the Boston College Center for Corporate Citizenship and engages with them for professional development offerings, benchmarking support, and networking. Boston College Center for Corporate Citizenship, one of the largest corporate membership organizations in the United States, serves over 500 corporate members around the world. Their ESG research reports and professional development courses educate and influence the strategies and efforts implemented by their corporate members. Their resources and publications on sustainability reporting, supply chain management, Task Force on Climate-related Financial Disclosures (TCFD), emerging ESG issues, and more could have an impact on policy, law, or regulation that may impact the climate. Learn more about this organization at: https://ccc.bc.edu/content/ccc/about.html. Dolby does not publicly disclose the funding figures of its associations or membership organizations.

(4.11.2.9) Funding figure your organization provided to this organization or individual in the reporting year (currency)

0

(4.11.2.11) Indicate if you have evaluated whether your organization's engagement is aligned with global environmental treaties or policy goals

Select from:

☑ Yes, we have evaluated, and it is aligned

Select all that apply

☑ Paris Agreement

Row 5

(4.11.2.1) Type of indirect engagement

Select from:

☑ Indirect engagement via other intermediary organization or individual

(4.11.2.2) Type of organization or individual

Select from:

☑ International Governmental Organization (IGO)

(4.11.2.3) State the organization or position of individual

The International Telecommunication Union (ITU) is the United Nations specialized agency for information and communication technologies – ICTs. The mission of the greater organization (ITU) is to maintain and extend international cooperation for the improvement and rational use of telecommunications of all kinds.

(4.11.2.5) Environmental issues relevant to the policies, laws, or regulations on which the organization or individual has taken a position

Select all that apply

☑ Climate change

(4.11.2.6) Indicate whether your organization's position is consistent with the organization or individual you engage with

Select from:

☑ Consistent

(4.11.2.7) Indicate whether your organization attempted to influence the organization or individual's position in the reporting year

Select from:

☑ No, we did not attempt to influence their position

(4.11.2.8) Describe how your organization's position is consistent with or differs from the organization or individual's position, and any actions taken to influence their position

ITU has three main areas of activity organized into sectors. Through its Radiocommunication Sector (ITU-R), Standardization Sector (ITU-T), and Development Sector (ITU-D), ITU covers the role of digital technologies within climate change to tackle e-waste and facilitate energy efficiency. ITU actively promotes the U.N. Sustainable Development Goals (SDGs) by linking and incorporating these goals into its strategies and aligning its activities and actions accordingly. By providing a neutral platform for global consensus, ITU offers a vital and efficient service to an industry that is already a main driver for social and economic development. Dolby participates as a member of the U.S. delegation of the ITU-R. In collaboration with the U.S. delegation of the ITU-R, Dolby video and audio technology was adopted into the ITU-R. In addition to the ITU-R, Dolby is a sector member of the ITU-T. Learn more about this organization at: https://www.itu.int/en/Pages/default.aspx. Dolby does not publicly disclose the funding figures of its associations or membership organizations.

(4.11.2.9) Funding figure your organization provided to this organization or individual in the reporting year (currency)

0

(4.11.2.11) Indicate if you have evaluated whether your organization's engagement is aligned with global environmental treaties or policy goals

Select from:
☑ Yes, we have evaluated, and it is aligned

(4.11.2.1) Type of indirect engagement

Select from:
☑ Indirect engagement via other intermediary organization or individual

(4.11.2.2) Type of organization or individual

Select from:

☑ Other, please specify :The Ultra HD Forum

(4.11.2.3) State the organization or position of individual

The Ultra HD Forum is an open forum composed of a broad range of participants from the movie and television ecosystem, including content creators, content distributors, consumer electronics manufacturers, professional equipment manufacturers and technology companies. By virtue of its diverse membership, the Ultra HD Forum will advocate an industry consensus around common technical standards.

(4.11.2.5) Environmental issues relevant to the policies, laws, or regulations on which the organization or individual has taken a position

Select all that apply

☑ Climate change

(4.11.2.6) Indicate whether your organization's position is consistent with the organization or individual you engage with

Select from:

☑ Consistent

(4.11.2.7) Indicate whether your organization attempted to influence the organization or individual's position in the reporting year

Select from:

☑ No, we did not attempt to influence their position

(4.11.2.8) Describe how your organization's position is consistent with or differs from the organization or individual's position, and any actions taken to influence their position

As one of the founding members of the Ultra HD Forum (UHDF), Dolby supports the UHDF in working to inform the industry regarding appropriate standards, industry best practices, and enabling technology through the production of white papers and informational "Master Classes" at major industry events. Of particular interest, the UHDF has an initiative called the "greening of streaming," which is looking at ways to reduce the carbon footprint for the growing distribution of media via the web.

This is a topic of relevance to Dolby, given the assertions that HDR video with brighter images can draw more power. Related to this, the UHDF has recently launched a sustainability working group to better understand the relative impact of Ultra HD technologies on video workflows. Learn more about this organization at: https://ultrahdforum.org/ Dolby does not publicly disclose the funding figures of its associations or membership organizations.

(4.11.2.9) Funding figure your organization provided to this organization or individual in the reporting year (currency)

0

(4.11.2.11) Indicate if you have evaluated whether your organization's engagement is aligned with global environmental treaties or policy goals

(4.11.2.7) Indicate whether your organization attempted to influence the organization or individual's position in the reporting year

Select from:

☑ No, we did not attempt to influence their position

(4.11.2.8) Describe how your organization's position is consistent with or differs from the organization or individual's position, and any actions taken to influence their position

While Dolby doesn't provide funding to the IEC directly, we do participate in the IEC regarding our efforts in standards development and observation. We typically participate actively when a particular group or project is aligned with our business objectives. Dolby has been involved in a project with the IEC about the energy usage of different legacy and HDR formats on a large selection of current TVs and how interested parties can assess and potentially reduce the power consumption of HDR content playback on modern TVs. Dolby actively but neutrally supported the group of experts comprised of TV manufacturers, display metrology companies, as well as parties influencing regulations. Learn more about their work on SDG 13: Climate Action at: https://www.iec.ch/climate-action.

☑ Climate change (one of five drivers of nature change)

(5.1.1.10) Assumptions, uncertainties and constraints in scenario

Dolby undertook a qualitative and quantitative climate-related scenario analysis against the SSP5-RCP8.5 scenario (Shared Socioeconomic Pathways (SSP) and Representative Concentration Pathways (RCP), which assumes a 4.0C increase in average temperatures by the end of the century. This RCP was used to evaluate the various climatic impacts in 2030 and 2050 for 8 physical hazards (i.e., extreme heat, pluvial flooding, riverine flooding, coastal flooding, wildfires, drought, water stress, and cyclones) across a material share of Dolby's portfolio of assets. Models from the Coupled Model Intercomparison Project (CMIP) were used to complete this analysis, and, although this is a reputable and standardized set of model simulations, they can produce a range of possible outcomes due to differences in assumptions about future greenhouse gas emissions, climate sensitivity, and the natural variability of the climate system. Therefore, this introduces key uncertainties stemming from the variability in climate models and their projections as well as the limitations in spatial and temporal resolution, which can affect the granularity and accuracy of predictions at local or regional levels. Moreover, the results of this scenario analysis solely depict inherent risks, which is based on a site's location, without taking into consideration the site's vulnerability to the risk or any existing mitigation or adaptation measures. Rather, it incorporates numerous models and assumptions to offer a broad overview of how the climate in the region where the site is situated might change in the future.

(5.1.1.11) Rationale for choice of scenario

This scenario was chosen because it represents a high warming trajectory, under which the most severe and disruptive impacts of climate change are anticipated. By focusing on a high warming scenario, Dolby aims to proactively address the most extreme potential conditions, including intensified heatwaves, increased frequency of extreme weather events, and significant shifts in climate patterns. These severe impacts could affect various aspects of Dolby's day to day activity, from supply chain disruptions and infrastructure damage to changes in energy demands and employee wellbeing. Strategic decisions informed by this scenario will enable Dolby to implement robust resilience measures, such as enhancing our contingency plans, diversifying supply sources, and moving away from areas with high exposure to climate risk. For instance, preparing for potential heatwaves might involve strategic decisions such as upgrading cooling systems. By anticipating these severe outcomes, Dolby can ensure operational continuity, reduce vulnerability, and maintain business resilience in the face of climate-related disruptions. This approach not only safeguards against future risks but also positions Dolby as a proactive leader in climate adaptation, ready to navigate and thrive amidst evolving environmental challenges.

(5.1.1.9) Driving forces in scenario

Local ecosystem asset interactions, dependencies and impacts
☑ Climate change (one of five drivers of nature change)

(5.1.1.10) Assumptions, uncertainties and constraints in scenario

Dolby undertook a qualitative and quantitative climate-related scenario analysis against the SSP2-RCP4.5 scenario (Shared Socioeconomic Pathways (SSP) and Representative Concentration Pathways (RCP), which assumes a 2.0C - 4C increase in average temperatures by the end of the century. This RCP was used to evaluate the various climatic impacts in 2030 and 2050 for 8 physical hazards (i.e., extreme heat, pluvial flooding, riverine flooding, coastal flooding, wildfires, drought, water stress, and cyclones) across a material share of Dolby's portfolio of assets. Models from the Coupled Model Intercomparison Project (CMIP) were used to complete this analysis, and, although this is a reputable and standardized set of model simulations, they can produce a range of possible outcomes due to differences in assumptions about future greenhouse gas emissions, climate sensitivity, and the natural variability of the climate system. Therefore, this introduces key uncertainties stemming from the variability in climate models and their projections as well as the limitations in spatial and temporal resolution, which can affect the granularity and accuracy of predictions at local or regional levels. Moreover, the results of this scenario analysis solely depict inherent risks, which is based on a site's location, without taking into consideration the site's vulnerability to the risk or any existing mitigation or adaptation measures. Rather, it incorporates numerous models and assumptions to offer a broad overview of how the climate in the region where the site is situated might change in the future.

(5.1.1.11) Rationale for choice of scenario

The medium warming scenario (SSP2-4.5) was selected to capture the impacts of a moderate increase in global temperatures, reflecting a trajectory with significant but not extreme climate changes. This scenario helps Dolby anticipate and prepare for intermediate climate risks, including increased frequency of weather extremes, and shifts in resource availability. By evaluating this scenario, Dolby can understand the impacts of moderate climate change on its operations and infrastructure, allowing for targeted adjustments and resilience planning. This scenario serves as a crucial middle ground for assessing the magnitude of change in physical climate risk, providing insights into potential challenges and enabling Dolby to develop strategies that address both moderate and more severe climate impacts effectively.

(5.1.1.9) Driving forces in scenario

Local ecosystem asset interactions, dependencies and impacts
☑ Climate change (one of five drivers of nature change)

(5.1.1.10) Assumptions, uncertainties and constraints in scenario

Dolby undertook a qualitative and quantitative climate-related scenario analysis against the SSP1-RCP2.6 scenario (Shared Socioeconomic Pathways (SSP) and Representative Concentration Pathways (RCP), which assumes temperatures of <2.0°C by the end of the century. This RCP was used to evaluate the various climatic impacts in 2030 and 2050 for 8 physical hazards (i.e., extreme heat, pluvial flooding, riverine flooding, coastal flooding, wildfires, drought, water stress, and cyclones) across a material share of Dolby's portfolio of assets. Models from the Coupled Model Intercomparison Project (CMIP) were used to complete this analysis, and, although this is a reputable and standardized set of model simulations, they can produce a range of possible outcomes due to differences in assumptions about future greenhouse gas emissions, climate sensitivity, and the natural variability of the climate system. Therefore, this introduces key uncertainties stemming from the variability in climate models and their projections as well as the limitations in spatial and temporal resolution, which can affect the granularity and accuracy of predictions at local or regional levels. Moreover, the results of this scenario analysis solely depict inherent risks, which is based on a site's location, without taking into consideration the site's vulnerability to the risk or any existing mitigation or adaptation measures. Rather, it incorporates numerous models and assumptions to offer a broad overview of how the climate in the region where the site is situated might change in the future.

(5.1.1.11) Rationale for choice of scenario

The low warming scenario (SSP1-2.6) was chosen alongside high and medium warming scenarios because it represents a future with relatively moderate climate impacts, characterized by a more modest increase in global temperatures. By examining this scenario, Dolby aims to understand the potential effects of less severe climate change, such as gradual shifts in weather patterns and moderate increases in extreme weather events. Using this scenario allows Dolby to evaluate the lower end of the climate risk spectrum, identifying impacts on operational efficiency, energy usage, and supply chain stability.

☑ 2050

(5.1.1.9) Driving forces in scenario

Regulators, legal and policy regimes

☑ Global regulation

(5.1.1.10) Assumptions, uncertainties and constraints in scenario

Dolby undertook a quantitative climate-related scenario analysis using the Network for Greening the Financial Systems (NGFS) scenarios. NGFS scenarios explore the impacts of climate change and the transition to a low carbon economy with the aim of providing a common reference framework. The Net Zero by 2050 scenario assumes temperatures of <1.4°C by the end of the century. This framework was used to evaluate Dolby's exposure to climate-related mandates over time through carbon pricing as an indicator for climate-related policy and regulatory stringency. This analysis leveraged Dolby's 2023 GHG inventory data to project emissions under future emissions growth and reduction scenarios. These emissions projections were then coupled with carbon pricing data from NGFS climate scenarios. The resulting values provide an indication of the level of climate policy stringency that Dolby may be exposed to in the future. The emission categories used included scope 1 and 2 emissions by country and select Scope 3 global emission categories.

(5.1.1.11) Rationale for choice of scenario

Leveraging scenarios that consider various plausible warming pathways offers a powerful tool for Dolby when considering climate-related implications of various macroeconomic factors that may impact strategy development. The NGFS Net Zero by 2050 scenario was chosen as it represents a rapid transition with stringent climate policies and technological innovation. Using this scenario allows Dolby to evaluate the extent to which emissions reduction could drive cost savings for Dolby over time, and conversely how a business-as-usual operational approach could lead to higher operational costs.

☑ Global regulation

(5.1.1.10) Assumptions, uncertainties and constraints in scenario

Dolby undertook a quantitative climate-related scenario analysis using the Network for Greening the Financial Systems (NGFS) scenarios. NGFS scenarios explore the impacts of climate change and the transition to a low carbon economy with the aim of providing a common reference framework. The Below 2 Degrees scenario assumes temperatures of <1.6°C by the end of the century. This framework was used to evaluate Dolby's exposure to climate-related mandates over time through carbon pricing as an indicator for climate-related policy and regulatory stringency. This analysis leveraged Dolby's 2023 GHG inventory data to project emissions under future emissions growth and reduction scenarios. These emissions projections were then coupled with carbon pricing data from NGFS climate scenarios. The resulting values provide an indication of the level of climate policy stringency that Dolby may be exposed to in the future. The emission categories used included scope 1 and 2 emissions by country and select Scope 3 global emission categories.

(5.1.1.11) Rationale for choice of scenario

Leveraging scenarios that consider various plausible warming pathways offers a powerful tool for Dolby when considering climate-related implications of various macroeconomic factors that may impact strategy development. The NGFS Below 2 Degrees scenario was chosen as it represents a scenario in which climate policies are introduced immediately and become gradually more stringent over time. Using this scenario allows Dolby to evaluate the extent to which emissions reduction could drive cost savings for Dolby over time, and conversely how a business-as-usual operational approach could lead to higher operational costs.

☑ Global regulation

(5.1.1.10) Assumptions, uncertainties and constraints in scenario

Dolby undertook a quantitative climate-related scenario analysis using the Network for Greening the Financial Systems (NGFS) scenarios. NGFS scenarios explore the impacts of climate change and the transition to a low carbon economy with the aim of providing a common reference framework. The Current Policies scenario assumes temperatures of greater than 3.0ºC by the end of the century. This framework was used to evaluate Dolby's exposure to climate-related mandates over time through carbon pricing as an indicator for climate-related policy and regulatory stringency. This analysis leveraged Dolby's 2023 GHG inventory data to project emissions under future emissions growth and reduction scenarios. These emissions projections were then coupled with carbon pricing data from NGFS climate scenarios. The resulting values provide an indication of the level of climate policy stringency that Dolby may be exposed to in the future. The emission categories used included scope 1 and 2 emissions by country and select Scope 3 global emission categories.

(5.1.1.11) Rationale for choice of scenario

Leveraging scenarios that consider various plausible warming pathways offers a powerful tool for Dolby when considering climate-related implications of various macroeconomic factors that may impact strategy development. The NGFS Current Policies scenario was chosen as it represents a scenario in which currently implemented policies are preserved, leading to emissions growth and minimal action towards the low-carbon transition. Using this scenario allows Dolby to evaluate the extent to which emissions reduction could drive cost savings for Dolby over time, and conversely how a business-as-usual operational approach could lead to higher operational costs.

(5.1.2) Provide details of the outcomes of your organization's scenario analysis.

Climate change

(5.1.2.1) Business processes influenced by your analysis of the reported scenarios

☑ Risk and opportunities identification, assessment and management

(5.1.2.2) Coverage of analysis

Select from:
☑ Organization-wide

(5.1.2.3) Summarize the outcomes of the scenario analysis and any implications for other environmental issues

Dolby undertook a qualitative and quantitative climate-related scenario analysis against the RCP8.5, RCP4.5 and RCP2.6 scenarios, which assume 4.0C, 2-3C and 1.5C increases (respectively) in average temperatures by the end of the century. These were used to evaluate the various climatic impacts in 2030 and 2050 for 8 physical hazards (i.e., extreme heat, pluvial flooding, riverine flooding, coastal flooding, wildfires, drought, water stress, and cyclones) across a material share of Dolby's portfolio of assets. This scenario analysis exercise allowed us to determine our top risks by exposure. We identified that extreme heat is the hazard to which our portfolio of screened assets would likely have the highest exposure in the future, under a high warming scenario. Moreover, our portfolio could also face high exposure to pluvial flooding and wildfires under a high warming scenario. These hazards could cause increased energy costs, power outages, and damage to our facilities and our partners' facilities, causing business interruption. We are in the process of determining the potentially substantive financial impacts of these risks, which will determine how we prioritize them going forward.

(5.2) Does your organization's strategy include a climate transition plan?

(5.2.1) Transition plan

(5.2.3) Publicly available climate transition plan

Select from:
☑ Yes

(5.2.4) Plan explicitly commits to cease all spending on, and revenue generation from, activities that contribute to fossil fuel expansion

Select from:
☑ No, and we do not plan to add an explicit commitment within the next two years

(5.2.6) Explain why your organization does not explicitly commit to cease all spending on and revenue generation from activities that contribute to fossil fuel expansion

Dolby has not prioritized this commitment since it is not a material area for us. In general, Dolby does not engage in activities that contribute to fossil fuel generation and does not generate revenue based on fossil fuel activities. We continue to embed our sustainability principles throughout the organization and are working toward being able to confidently make these types of explicit commitments.

(5.2.7) Mechanism by which feedback is collected from shareholders on your climate transition plan

Select from:
☑ We have a different feedback mechanism in place

(5.2.8) Description of feedback mechanism

Each year, our Sustainability Report is reviewed by our legal team as well as executive leaders. It is also shared with our Board. In the Report, we encourage stakeholders to provide feedback via email, alongside specific instructions. In addition, our science-based targets were validated by the Science Based Target initiative (SBTi). These science-based targets were developed through the support of internal stakeholders, external consultants, and validated by experts at SBTi.

(5.2.9) Frequency of feedback collection

☑ Annually

(5.2.10) Description of key assumptions and dependencies on which the transition plan relies

We are assuming that we can decrease our emissions in line with our science-based targets (SBTs). We will aim to achieve this by lowering the carbon intensity of our Cinema product portfolio; engaging at least 58% of our suppliers by emissions, which we expect to reduce our Scope 3 emissions related to Purchased Goods & Services and Capital Goods; reducing our business travel emissions through internal education, programs and sustainable travel alternatives; and continuing our commitment to the procurement of 100% renewable electricity each year alongside ongoing energy efficiency projects at our global facilities where possible.

(5.2.11) Description of progress against transition plan disclosed in current or previous reporting period

We have made good progress on our SBTs and are on track to achieve them. We have internal teams in place to measure and manage our SBTs in each of the respective areas and have formal quarterly meetings internally to gauge progress and address roadblocks. We have continued making progress on our supplier-related SBT. We've also continued to improve our data collection with respect to business travel, which will enable us to be more proactive in managing these emissions and supporting the business with transparency, as well as education on alternative ways to travel sustainably. Additionally, we achieved 100% renewable for our operations for the third consecutive year. We will continue to report on our progress each year in our Sustainability Report.

(5.2.12) Attach any relevant documents which detail your climate transition plan (optional)

2024-Dolby Sustainability-Report.pdf

(5.2.13) Other environmental issues that your climate transition plan considers

☑ OPEX

(5.4.1.6) Amount of selected financial metric that is aligned in the reporting year (currency)

$572,514

(5.4.1.7) Percentage share of selected financial metric aligned in the reporting year (%)

0.1

(5.4.1.8) Percentage share of selected financial metric planned to align in 2025 (%)

0.1

(5.4.1.9) Percentage share of selected financial metric planned to align in 2030 (%)

0.1

(5.4.1.12) Details of the methodology or framework used to assess alignment with your organization's climate transition

Within Dolby's accounting system, we have implemented measures to support us in tracking our global company-wide sustainability-related expenses. We have a specific identifier that is used when purchase orders are created to indicate that they are sustainability-related expenses. We can then sort by this identifier to track these expenses across the company. Additionally, we created a unique cost center to track all corporate expenses related to our carbon neutral and renewable energy commitments so that we can clearly determine the costs incurred at the corporate level versus those specific to an activity within the business. These measures were implemented over the last year, and we are continuing to work to ensure the processes are adhered to across the company; therefore, this does not capture all sustainability-related expenses but those that we have tracked thus far. We are continuing to evolve our processes to provide a comprehensive view of these expenses. We have not set goals on this metric for 2025 or 2030 at this time.

(5.9) What is the trend in your organization's water-related capital expenditure (CAPEX) and operating expenditure (OPEX) for the reporting year, and the anticipated trend for the next reporting year?

(5.9.1) Water-related CAPEX (+/- % change)

0

(5.9.2) Anticipated forward trend for CAPEX (+/- % change)

0

(5.9.3) Water-related OPEX (+/- % change)

0

(5.9.4) Anticipated forward trend for OPEX (+/- % change)

0

(5.9.5) Please explain

As a company with 93% of its revenue coming from technology licensing arrangements and no direct manufacturing, water is not a material issue for Dolby; however, we recognize the importance of water conservation and work to conserve water at our corporate offices around the world.

(5.10) Does your organization use an internal price on environmental externalities?

(5.10.1) Use of internal pricing of environmental externalities

Select from:
☑ No, but we plan to in the next two years

(5.10.3) Primary reason for not pricing environmental externalities

Select from:
☑ No standardized procedure

(5.10.4) Explain why your organization does not price environmental externalities

We are evaluating opportunities to implement an internal carbon fee that would apply to our business travel emissions. This would enable us to align the business activity with the required funding. Dolby has maintained CarbonNeutral certification for its business travel emissions since 2020 and we purchase high-quality, third-party verified, carbon offsets each year to maintain our certification (in alignment with The CarbonNeutral Protocol). We believe that providing more transparency internally will support behavioral changes to support us in meeting our targets.

(5.11) Do you engage with your value chain on environmental issues?

Other value chain stakeholders

(5.11.1) Engaging with this stakeholder on environmental issues

Select from:

☑ No, but we plan to within the next two years

(5.11.3) Primary reason for not engaging with this stakeholder on environmental issues

Select from:

☑ Not an immediate strategic priority

(5.11.4) Explain why you do not engage with this stakeholder on environmental issues

Currently, we engage with our customers, suppliers and investors on various sustainability issues and initiatives. Specifically, we are supporting our suppliers in setting their own science-based targets and provide tools and resources to do so. We respond regularly to customers on various ESG inquiries and investors upon request. We will be including all of these stakeholders in our double materiality assessment. There has not been a need to engage with other members of our value chain at this time, but we look forward to exploring opportunities to engage with our ecosystem partners within the next two years.

(5.11.1) Does your organization assess and classify suppliers according to their dependencies and/or impacts on the environment?

Climate change

(5.11.1.1) Assessment of supplier dependencies and/or impacts on the environment

Select from:

☑ Yes, we assess the dependencies and/or impacts of our suppliers

(5.11.1.2) Criteria for assessing supplier dependencies and/or impacts on the environment

Select all that apply

☑ Contribution to supplier-related Scope 3 emissions

Select from:

☑ 100%

(5.11.1.4) Define a threshold for classifying suppliers as having substantive dependencies and/or impacts on the environment

We evaluate our overall supplier spend and prioritize supplier engagement based on their estimated emissions. We engage with suppliers with the highest emissions to meet our science-based target where we are aiming to reach 58% by emissions.

(5.11.1.5) % Tier 1 suppliers meeting the threshold for substantive dependencies and/or impacts on the environment

Select from:
☑ 51-75%

(5.11.1.6) Number of Tier 1 suppliers meeting the thresholds for substantive dependencies and/or impacts on the environment

250

(5.11.2) Does your organization prioritize which suppliers to engage with on environmental issues?

Climate change

(5.11.2.1) Supplier engagement prioritization on this environmental issue

Select from:
☑ Yes, we prioritize which suppliers to engage with on this environmental issue

(5.11.2.2) Criteria informing which suppliers are prioritized for engagement on this environmental issue

Select all that apply
☑ Procurement spend

(5.11.2.4) Please explain

We've engaged our suppliers since 2023 to make progress on our Purchased Goods and Services and Capital Goods science-based target (SBT), which is to have 58% of our suppliers (by emissions) set their own SBTs by the end of CY2027. We identified our top suppliers by emissions and are engaging them wherever they

are on their sustainability journey. We're providing them with tools and support to assist in a myriad of ways — from third-party greenhouse gas inventory development to analytics and benchmarking support. This engagement strengthens our relationships with suppliers, improves the quality of our supplier emissions data, ensures that we're on track to meet our target, and accelerates positive change.

(5.11.5) Do your suppliers have to meet environmental requirements as part of your organization's purchasing process?

Climate change

(5.11.5.1) Suppliers have to meet specific environmental requirements related to this environmental issue as part of the purchasing process

Select from:
☑ No, but we plan to introduce environmental requirements related to this environmental issue within the next two years

(5.11.5.3) Comment

As part of our supplier onboarding process, all our suppliers receive, read, and acknowledge (i) Dolby's Business Partner Code of Conduct ("Partner Code"), (ii) Dolby's Anticorruption Policy, and (iii) Dolby's Modern Slavery Act and Transparency Statement. The Partner Code serves as our supplier code of conduct. It includes Dolby's expectations for suppliers (and other business partners) on an array of topics such as Conflict Minerals, Human Rights, Environmental Stewardship, and Sustainability. The Partner Code is incorporated in our supplier agreements. Aside from our Partner Code, we ask our suppliers to update or complete a Conflict Minerals Report, which collects sourcing information on minerals used in our products and requires suppliers to make certain declarations regarding sourcing from conflict regions. Pursuant to the Partner Code, direct suppliers are required to complete a Declaration of Compliance Form.

(5.11.7) Provide further details of your organization's supplier engagement on environmental issues.

Select from:

☑ Unknown

(5.11.9.5) Rationale for engaging these stakeholders and scope of engagement

We place a high priority on engaging with our customers who are working on meeting their own sustainability requirements and have specific requests of their suppliers. Our approach includes collaborative efforts, such as sharing environmental data and ESG information with customers inquiring about our initiatives and/or sustainability data. Our team takes a proactive stance on customer engagement, and we aim to keep our customers informed of our latest achievements and progress toward our long-term initiatives and targets. We send our Sustainability Report and other relevant sustainability- related documents to those of our top customers who have expressed interest. We utilize various channels to communicate Dolby's climate-related strategies, goals, performance metrics, and ongoing progress. These include targeted email communications, one-on-one customer meetings, quarterly business reviews, and other appropriate platforms. This multi-faceted approach ensures our stakeholders remain well-informed about our commitment to sustainability.

(5.11.9.6) Effect of engagement and measures of success

While we have not yet established specific KPIs or success measures, we are maturing our processes for tracking our engagement and the related outcomes. We have seen positive results from our customer engagements, including increased communication. Additionally, we have made our sustainability content more prominent on our company website for our customers, all of our stakeholders, and our Dolby Licensee Community to easily access.

Climate change

(5.11.9.1) Type of stakeholder

Select from:
☑ Investors and shareholders

(5.11.9.2) Type and details of engagement

Education/Information sharing
☑ Share information on environmental initiatives, progress and achievements

☑ 1-25%

(5.11.9.4) % stakeholder-associated scope 3 emissions

Select from:
☑ None

(5.11.9.5) Rationale for engaging these stakeholders and scope of engagement

Engaging with our investors and shareholders is crucial because it helps build trust and transparency, which are essential for maintaining their confidence and support. These engagements are upon request and over the last few years we have experienced interest from investors in understanding more about our sustainability strategy and efforts.

(5.11.9.6) Effect of engagement and measures of success

While we have not yet established specific KPIs or success measures, we are maturing our processes for tracking our engagement and the related outcomes. We have seen positive results from our investor engagements. Additionally, we have made our sustainability content more prominent across our company website for all interested parties.

C6. Environmental Performance - Consolidation Approach

(6.1) Provide details on your chosen consolidation approach for the calculation of environmental performance data.

Climate change

(6.1.1) Consolidation approach used

Select from:
☑ Operational control

(6.1.2) Provide the rationale for the choice of consolidation approach

Dolby uses the "control approach" to set organizational boundaries for its Greenhouse Gas (GHG) inventory and is including all leased facilities. Consistent with this approach, Dolby is responsible for GHG emissions from locations and vehicles (whether leased or owned) for which it has direct control over operations. The "control approach" is the most appropriate organizational boundary because it is most reflective of overall business operations where Dolby can influence decisions that affect GHG emissions. By adopting an Operational Control approach to determine the boundaries of the company's GHG inventory, Dolby has elected to quantify and report emissions associated with operations over which the company has direct control.

Water

(6.1.1) Consolidation approach used

(6.1.2) Provide the rationale for the choice of consolidation approach

Dolby uses the "control approach" to set organizational boundaries for its water data.

Plastics

(6.1.1) Consolidation approach used

Select from:
☑ Operational control

(6.1.2) Provide the rationale for the choice of consolidation approach

Dolby has yet to examine its consolidation approach regarding plastics but will most likely maintain a similar approach to its GHG inventory and utilize operational control in the future.

Biodiversity

(6.1.1) Consolidation approach used

Select from:
☑ Operational control

(6.1.2) Provide the rationale for the choice of consolidation approach

Dolby has yet to examine its consolidation approach regarding biodiversity but will most likely maintain a similar approach to its GHG inventory and utilize operational control in the future.

C7. Environmental performance - Climate Change

(7.1) Is this your first year of reporting emissions data to CDP?

Select from:
☑ No

(7.1.1) Has your organization undergone any structural changes in the reporting year, or are any previous structural changes being accounted for in this disclosure of emissions data?

(7.1.1.1) Has there been a structural change?

Select all that apply
☑ Yes, an acquisition

(7.1.1.2) Name of organization(s) acquired, divested from, or merged with

THEO Technologies

(7.1.1.3) Details of structural change(s), including completion dates

On July 24, 2024, Dolby completed the acquisition of all outstanding equity interests of THEO, a privately held company. THEO's products enable high-quality online video experiences for customers across sports and entertainment. This acquisition expands on our suite of cloud solutions to provide seamless, synchronized viewer experiences in sports and entertainment. We have included the financial results of THEO in our consolidated financial statements from the date of acquisition, and these results were not material. Additionally, the transaction costs associated with the acquisition were not material. The emissions associated with THEO (including one site in Belgium) were not available during the FY24 sustainability reporting cycle which includes this CDP report. They will be accounted for in future reporting.

(7.1.2) Has your emissions accounting methodology, boundary, and/or reporting year definition changed in the reporting year?

	Change(s) in methodology, boundary, and/or reporting year definition?
	Select all that apply ☑ No

(7.1.3) Have your organization's base year emissions and past years' emissions been recalculated as a result of any changes or errors reported in 7.1.1 and/or 7.1.2?

(7.1.3.1) Base year recalculation

Select from:
☑ No, because we do not have the data yet and plan to recalculate next year

(7.1.3.3) Base year emissions recalculation policy, including significance threshold

We were not able to gather the necessary emissions related data regarding the THEO acquisition for this reporting year, but this will be accounted for in future reporting years in alignment with the Greenhouse Gas (GHG) Protocol. Dolby follows the GHG Protocol to determine our significance threshold. According to the GHG Protocol, base year emissions should be adjusted when a change in calculation methodologies (among other reasons) triggers a significant cumulative change in the entity's base year emissions: "Significant is defined as a cumulative change of 5% or larger in an entity's total base year emissions (Scope 1, Scope 2, and combustion from biomass from stationary and mobile combustion and indirect emissions, as well as any optionally reported worldwide Scope 1 and 2 emissions, on a CO2e basis)."

(7.1.3.4) Past years' recalculation

Select from:
☑ No

(7.2) Select the name of the standard, protocol, or methodology you have used to collect activity data and calculate emissions.

Select all that apply

☑ The Greenhouse Gas Protocol: A Corporate Accounting and Reporting Standard (Revised Edition)

☑ The Greenhouse Gas Protocol: Scope 2 Guidance

☑ The Greenhouse Gas Protocol: Corporate Value Chain (Scope 3) Standard

(7.3) Describe your organization's approach to reporting Scope 2 emissions.

	Scope 2, location-based	Scope 2, market-based	Comment
	Select from: ☑ We are reporting a Scope 2, location-based figure	*Select from:* ☑ We are reporting a Scope 2, market-based figure	*N/A*

(7.4) Are there any sources (e.g. facilities, specific GHGs, activities, geographies, etc.) of Scope 1, Scope 2 or Scope 3 emissions that are within your selected reporting boundary which are not included in your disclosure?

Select from:

☑ No

(7.5) Provide your base year and base year emissions.

Scope 1

(7.5.1) Base year end

09/27/2019

(7.5.2) Base year emissions (metric tons CO2e)

1401

(7.5.3) Methodological details

Scope 1 emissions include all direct GHG emissions associated with sources owned or controlled by the company. Dolby reports emissions for all major direct emission sources where actual data is available including stationary and mobile combustion and fugitive emissions. Dolby leverages the emission factors and metrics specific to the reporting period (i.e., the base year) to ensure representative emission results. Due to guidance provided by SBTi we have moved all fugitive emissions to Scope 1 resulting in a different value than historically reported for our base year to ensure a more accurate comparison to current values.

Scope 2 (location-based)

(7.5.1) Base year end

09/27/2019

(7.5.2) Base year emissions (metric tons CO2e)

5518

(7.5.3) Methodological details

Dolby provides actual electricity consumption data in kilowatt-hours (kWh) for its sites across the Americas, APAC, and EMEA where available. To calculate emissions for these sites, electricity consumption is multiplied by the appropriate market-based emission factors. For sites where electricity purchases are tracked, Dolby lists the utility provider. Utility-specific emission factors are applied, where available, to calculate market-based emissions. Where Dolby does not have visibility to purchased electricity data, Dolby uses building energy intensity rates to calculate electricity consumption from the US Department of Energy's Building Performance Dataset. The floor area for each site is then multiplied by the building energy intensity rate to determine estimated electricity consumption. Estimated electricity is then multiplied by the appropriate market-based emission factors.

Scope 2 (market-based)

(7.5.1) Base year end

09/27/2019

(7.5.2) Base year emissions (metric tons CO2e)

3913

(7.5.3) Methodological details

Dolby provides actual electricity consumption data in kilowatt-hours (kWh) for its sites across the Americas, APAC, and EMEA where available. To calculate emissions for these sites, electricity consumption is multiplied by the appropriate market-based emission factors. For sites where electricity purchases are tracked, Dolby lists the utility provider. Utility-specific emission factors are applied, where available, to calculate market-based emissions. Where Dolby does not have visibility to purchased electricity data, Dolby uses building energy intensity rates to calculate electricity consumption from the US Department of Energy's Building Performance Dataset. The floor area for each site is then multiplied by the building energy intensity rate to determine estimated electricity consumption. Estimated electricity is then multiplied by the appropriate market-based emission factors.

Scope 3 category 1: Purchased goods and services

(7.5.1) Base year end

09/27/2019

(7.5.2) Base year emissions (metric tons CO2e)

52529

(7.5.3) Methodological details

This emissions category's calculation is based upon Dolby's procurement activity data. This spend-based assessment for Dolby used emissions factors from the EXIOBASE multi-regional environmentally extended input-output (MR EE-IO) model developed by a consortium of research institutes.

Scope 3 category 2: Capital goods

(7.5.1) Base year end

09/27/2019

(7.5.2) Base year emissions (metric tons CO2e)

11309

(7.5.3) Methodological details

This emissions category's calculation is based upon Dolby's procurement activity data. This spend-based assessment for Dolby used emissions factors from the EXIOBASE multi-regional environmentally extended input-output (MR EE-IO) model developed by a consortium of research institutes.

Scope 3 category 3: Fuel-and-energy-related activities (not included in Scope 1 or 2)

(7.5.1) Base year end

09/27/2019

(7.5.2) Base year emissions (metric tons CO2e)

1073

(7.5.3) Methodological details

Fuel-and-Energy-Related Activities (FERA) emissions reported are based on the market-based approach. Emissions are calculated using activity data captured under Scopes 1 & 2. The activity data is organized by fuel type and electricity consumption by site and region. The data is multiplied by the appropriate emission factors from the UK Defra / BEIS 2022 Conversion Factors for Company Reporting, AIB Residual Mix, EPA eGRID, IEA emission factors, Canada National Inventory Report (NIR), and Green-e residual mix 2022. The methodological approach for FERA was refined based on the identification of a historical error, which has since been corrected.

Scope 3 category 4: Upstream transportation and distribution

(7.5.1) Base year end

09/27/2019

(7.5.2) Base year emissions (metric tons CO2e)

9455

(7.5.3) Methodological details

This emissions category's calculation is based upon Dolby's procurement activity data. This spend-based assessment for Dolby used emissions factors from the EXIOBASE multi-regional environmentally extended input-output (MR EE-IO) model developed by a consortium of research institutes.

Scope 3 category 5: Waste generated in operations

(7.5.1) Base year end

09/27/2019

(7.5.2) Base year emissions (metric tons CO2e)

108

(7.5.3) Methodological details

Dolby collects actual and estimated waste tonnages by waste stream, including landfilled mixed municipal solid waste, recycled municipal solid waste, composted material, recycled clean paper, combusted mixed municipal solid waste (waste to energy), recycled electronic waste, and recycled hazardous waste. Emissions for each waste stream are calculated using methodologies and emission factors from the EPA's Waste Reduction Model (WARM) and the GHG Protocol's Corporate Value Chain (Scope 3) Standard.

Scope 3 category 6: Business travel

(7.5.1) Base year end

09/27/2019

(7.5.2) Base year emissions (metric tons CO2e)

15296

(7.5.3) Methodological details

Dolby includes air travel, car rentals, trips taken in employee personal vehicles, and hotel stays in emissions for business travel. Dolby tracks and reports air travel by short/medium/long distance thresholds in alignment with industry best practice. To calculate emissions from air travel, individual flights are assigned a haul type (short, medium, long) based on total distance traveled and a passenger class (economy, business, first, etc.). The trips by haul type and passenger class are multiplied by the appropriate Defra emissions factor for well-to-tank (WTT) emissions and tank-to-wheel (TTW) emissions to cover complete well-to-wheel (WTW) emissions. As per UK Defra guidance, Dolby includes the influence of radiative forcing (RF) in air travel emissions to capture the total climate impact of business air travel. RF is a measure of the environmental impact of emissions of NOx (nitrous oxides) and water vapor when emitted at high altitude further increasing the climate warming caused by air travel. RF emissions are calculated by taking the total mileage per haul type and cabin class and multiplying it by the UK Defra TTW emissions factor for CO2 only. The result is then multiplied by Defra's 0.9 RF factor to find the estimated radiative forcing emissions.

Scope 3 category 7: Employee commuting

(7.5.1) Base year end

09/27/2019

(7.5.2) Base year emissions (metric tons CO2e)

4356

(7.5.3) Methodological details

Dolby provides monthly average office attendance using badge-in data at sites where data is available. Dolby calculates an estimated number of days that employees spend in the office to determine annual commuting percentage and an annual WFH percentage. To do this, total average office attendance per week is determined based on the annual attendance data is divided by the total number of working days in a week (5) to find the annual commuting average (%). To estimate annual WFH averages, annual commuting averages (%) are subtracted from 100%. At sites where badge-in data is not available, Dolby applies an average of all annual commuting percentages. Employees at these sites are assumed to WFH for the remaining percentage. Full-time remote employees only contribute to WFH emissions. Dolby provides a list of employees' home zip codes, their assigned office zip code, and whether the employee is a FT-remote worker. Using longitudinal and latitudinal coordinates associated with the employee's home zip code and their assigned office zip code, Dolby calculates an estimated commute distance in miles. For commuter distances below 50 miles, employees are assumed to commute by passenger car. For commuter distances between 50 and 100 miles, employees are assumed to commute by rail. Distances above 100 miles are assumed to be outliers and a country-level average commute distance is applied using employee commuter distances that travel by passenger car. Each employees' commute distance from home to office is multiplied by two to account for commutes both ways. Then, commute distance per day is multiplied by the assumed number of working days within the year (250 days, accounting for holidays and weekends) to determine total annual commute distance. Total annual commute distance is multiplied by the employees' corresponding office annual commuting average (%). This distance is then multiplied by the appropriate fuel combustion emission factor from the US EPA and the appropriate fuel WTT emissions factor from UK Defra.

Scope 3 category 8: Upstream leased assets

(7.5.1) Base year end

09/27/2019

(7.5.2) Base year emissions (metric tons CO2e)

0

(7.5.3) Methodological details

Dolby's Upstream Leased Assets (ULA) emissions stem from its co-location data centers. The direct energy consumption from the data centers is covered under Scope 1 and 2 whereas the overhead electricity use by the data centers is included in ULA. To calculate overhead electricity emissions, Dolby multiplies monthly IT power consumption (kWh) by the Power Usage Effectiveness (PUE) for each data center. IT power consumption is then subtracted from the result to find Overhead power consumption (kWh), which is then multiplied by the corresponding US EPA eGRID emission factor. The co-locations selected by Dolby operate on 100% renewable electricity, resulting in reported emissions of zero.

Scope 3 category 9: Downstream transportation and distribution

(7.5.1) Base year end

09/27/2019

(7.5.2) Base year emissions (metric tons CO2e)

1192

(7.5.3) Methodological details

To calculate emissions from Dolby's DT&D, downstream spend is aggregated by GL Description and Mode of Transport. GL Descriptions include Delivery & Postage and Freight Sales. Mode of Transport includes Air, Road, Air/Road, and Air/Sea. Dolby is not able to distinguish Mode of Transport for some spend and makes estimates based on internal knowledge of its supply chain. Spend by GL Description and Mode of Transport are then mapped to the appropriate EEIO factor under the 'summary' and 'detail' levels for industry and commodity sectors. Please see the EEIO Spend-Based Analysis section for more details on the criteria for assigning 'summary' and 'detail' level EEIO factors. Where Mode of Transport lists two transport types (e.g., Air/Road or Air/Sea), a custom EEIO factor is applied taking the average of the EEIO factor specific to each individual mode of transport (e.g., for Air/Road, the average of the EEIO factor for air transport and truck transport is applied).

Scope 3 category 10: Processing of sold products

(7.5.1) Base year end

09/27/2019

(7.5.2) Base year emissions (metric tons CO2e)

0

(7.5.3) Methodological details

Processing of Sold Products (PSP) covers emissions from processing by downstream companies of products sold by the reporting company. Dolby does not calculate emissions from PSP because these emissions are considered immaterial, as only a subset of Dolby products require intermediate processing. In relation to this category of emissions, Dolby provides deliverables to customers in the form of codecs, software code, and/or IP, which are then integrated into products such as computers, sound bars, televisions, cell phones, or passenger vehicles. Because they are technology and/or software based, they require a lower level of processing and therefore, the energy required for integration is minimal. Dolby will annually assess product sales to evaluate PSP's relevance. Further, other tech hardware companies with PSP generally observed that the emissions associated with this category fall well below a materiality threshold of 5%.

Scope 3 category 11: Use of sold products

(7.5.1) Base year end

09/27/2019

(7.5.2) Base year emissions (metric tons CO2e)

50733

(7.5.3) Methodological details

Per product type, Dolby collects the power rating, lifetime energy use, average product lifetime, and the total quantity of product types sold by customer country for each reporting period. This allows Dolby to determine total energy use over the products' lifetime. Total energy use is then multiplied by the appropriate country-specific emission factor (MT CO2e/kWh consumed) to determine emission totals for the Use of Sold Products across Dolby's global sales. We leverage the

appropriate emission factors from; the UK Defra / BEIS Conversion Factors for Company Reporting, AIB Residual Mix, EPA eGRID, IEA emission factors, Canada National Inventory Report (NIR), and Green-e residual mix.

Scope 3 category 12: End of life treatment of sold products

(7.5.1) Base year end

09/27/2019

(7.5.2) Base year emissions (metric tons CO2e)

86

(7.5.3) Methodological details

Per product type, Dolby collects the material type, actual and estimated product weight, and the total quantity of product types sold. Dolby assigns disposal methods using U.S. EPA averages for waste disposal by waste type. Emissions are calculated by distributing the total weight of each product type to a range of disposal methods and multiplying the weight values with the emission factors from the EPA WARM tool.

Scope 3 category 13: Downstream leased assets

(7.5.1) Base year end

09/27/2019

(7.5.2) Base year emissions (metric tons CO2e)

430

(7.5.3) Methodological details

Dolby calculates Downstream Leased Assets using estimated Scope 1 and 2 activity data from assets owned by Dolby and leased to other entities within the reporting year. Dolby multiplies activity data by emissions factors from the U.S. EPA, US EPA eGRID, IEA, Green-e residual factors, and European Residual Mixes.

Scope 3 category 14: Franchises

(7.5.1) Base year end

09/27/2019

(7.5.2) Base year emissions (metric tons CO2e)

0

(7.5.3) Methodological details

Franchises are not a relevant emissions category to Dolby as Dolby does not participate in franchising activities.

Scope 3 category 15: Investments

(7.5.1) Base year end

09/27/2019

(7.5.2) Base year emissions (metric tons CO2e)

0

(7.5.3) Methodological details

Dolby currently deems this category to be not relevant. As the methodology for this category is developed further, we will revisit this category as needed to ensure that it remains not relevant.

(7.8) Account for your organization's gross global Scope 3 emissions, disclosing and explaining any exclusions.

Purchased goods and services

(7.8.1) Evaluation status

Select from:
☑ Relevant, calculated

(7.8.2) Emissions in reporting year (metric tons CO2e)

36775

(7.8.3) Emissions calculation methodology

Select all that apply
☑ Spend-based method

(7.8.4) Percentage of emissions calculated using data obtained from suppliers or value chain partners

0

(7.8.5) Please explain

The emissions calculation methodology was based upon Dolby's procurement data. This spend-based assessment for Dolby used emissions factors from the EXIOBASE multi-regional environmentally extended input-output (MR EE-IO) model, developed by a consortium of research institutes. Dolby uses a spend-based approach and applies emission intensity factors from an EXIOBASE, which provides a more robust estimate of spend for suppliers and associated currencies outside

of the USA to quantify emissions. Dolby's purchases are frequently from suppliers outside of the USA and especially products that are manufactured outside of the USA, so this is a more representative approach.

The emissions calculation methodology was based upon Dolby's procurement data. This spend-based assessment for Dolby used emissions factors from the EXIOBASE multi-regional environmentally extended input-output (MR EE-IO) model, developed by a consortium of research institutes. Dolby uses a spend-based approach and applies emission intensity factors from an EXIOBASE, which provides a more robust estimate of spend for suppliers and associated currencies outside of the USA to quantify emissions. Dolby's purchases are frequently from suppliers outside of the USA and especially products that are manufactured outside of the USA, so this is a more representative approach.

(7.8.5) Please explain

Fuel-and-Energy-Related Activities (FERA) emissions reported are based on the market-based approach. Emissions are calculated using activity data captured under Scopes 1 & 2. The activity data is organized by fuel type and electricity consumption by site and region. The data is multiplied by the appropriate emission factors from the UK Defra / BEIS 2022 Conversion Factors for Company Reporting, AIB Residual Mix, EPA eGRID, IEA emission factors, Canada National Inventory Report (NIR), and Green-e residual mix 2022.

(7.8.5) Please explain

Dolby collects actual and estimated waste tonnages by waste stream, including landfilled mixed municipal solid waste, recycled municipal solid waste, composted material, recycled clean paper, combusted mixed municipal solid waste (waste to energy), recycled electronic waste, and recycled hazardous waste. Where activity data gaps were presented but waste was expected to take place, tonnage was estimated using corporate-based intensities. Emissions for each waste stream are calculated using methodologies and emission factors from the EPA's Waste Reduction Model (WARM) and the GHG Protocol's Corporate Value Chain (Scope 3) Standard.

Business travel

☑ Spend-based method
☑ Distance-based method

(7.8.4) Percentage of emissions calculated using data obtained from suppliers or value chain partners

0

(7.8.5) Please explain

Dolby includes air travel, car rentals, trips taken in employee personal vehicles, and hotel stays in emissions for business travel. Dolby tracks and reports air travel by short/medium/long distance thresholds in alignment with industry best practice. To calculate emissions from air travel, individual flights are assigned a haul type (short, medium, long) based on total distance traveled and a passenger class (economy, business, first, etc.). The trips by haul type and passenger class are multiplied by the appropriate Defra emissions factor for well-to-tank (WTT) emissions and tank-to-wheel (TTW) emissions to cover complete well-to-wheel (WTW) emissions. As per UK Defra guidance, Dolby includes the influence of radiative forcing (RF) in air travel emissions to capture the total climate impact of business air travel. RF is a measure of the environmental impact of emissions of NOx (nitrous oxides) and water vapor when emitted at high altitude further increasing the climate warming caused by air travel. RF emissions are calculated by taking the total mileage per haul type and cabin class and multiplying it by the UK Defra TTW emissions factor for CO2 only. The result is then multiplied by Defra's 0.9 RF factor to find the estimated radiative forcing emissions.

Employee commuting

☑ Distance-based method

(7.8.4) Percentage of emissions calculated using data obtained from suppliers or value chain partners

0

(7.8.5) Please explain

Dolby assessed employee commute and work-from-home (WFH) emissions using a combination of badge-in data, employee headcount, home and office zip codes, and a detailed employee commute survey. Commute emissions were calculated using a distance-based method, factoring in roundtrip distances, commuting frequency, and transportation modes based on distance thresholds and regional commuter programs. WFH emissions were calculated using an average data

method, applying regional energy intensity rates to estimate electricity and natural gas use for both hybrid and fully remote employees. Where direct data was unavailable, Dolby applied site averages to ensure comprehensive coverage. The survey data significantly enhanced the accuracy and representativeness of the calculations.

Upstream leased assets

(7.8.2) Emissions in reporting year (metric tons CO2e)

0

(7.8.3) Emissions calculation methodology

Select all that apply
☑ Asset-specific method

(7.8.4) Percentage of emissions calculated using data obtained from suppliers or value chain partners

0

(7.8.5) Please explain

Dolby's Upstream Leased Assets (ULA) emissions stem from its co-location data centers. The direct energy consumption from the data centers is covered under Scope 1 and 2 whereas the overhead electricity use by the data centers is included in ULA. To calculate overhead electricity emissions, Dolby multiplies monthly IT power consumption (kWh) by the Power Usage Effectiveness (PUE) for each data center. IT power consumption is then subtracted from the result to find Overhead power consumption (kWh), which is then multiplied by the corresponding US EPA eGRID emission factor. The co-locations that Dolby operates in are powered by 100% renewable electricity, which is why the emissions are reported as zero.

Downstream transportation and distribution

(7.8.1) Evaluation status

Select from:
☑ Relevant, calculated

(7.8.2) Emissions in reporting year (metric tons CO2e)

(7.8.3) Emissions calculation methodology

Select all that apply
☑ Spend-based method

(7.8.4) Percentage of emissions calculated using data obtained from suppliers or value chain partners

0

(7.8.5) Please explain

To calculate emissions from Dolby's downstream transportation and distribution, downstream spend is aggregated by Description and Mode of Transport. Descriptions include Delivery & Postage and Freight Sales. Mode of Transport includes Air, Road, Air/Road, and Air/Sea. Dolby is not able to distinguish Mode of Transport for some spend and makes estimates based on internal knowledge of its supply chain. Spend by Description and Mode of Transport are then mapped to the appropriate EEIO factor under the 'summary' and 'detail' levels for industry and commodity sectors.

Processing of sold products

(7.8.1) Evaluation status

Select from:
☑ Not relevant, explanation provided

(7.8.5) Please explain

Processing of Sold Products (PSP) covers emissions from processing by downstream companies of products sold by the reporting company. Dolby does not calculate emissions from PSP because these emissions are considered immaterial, as only a subset of Dolby products require intermediate processing. In relation to this category of emissions, Dolby provides deliverables to customers in the form of codecs, software code, and/or IP, which are then integrated into products such as

computers, sound bars, televisions, cell phones, or passenger vehicles. Because they are technology and/or software based, they require a lower level of processing and therefore, the energy required for integration is minimal. Dolby will annually assess product sales to evaluate PSP's relevance. Further, other technology hardware companies with PSP generally observed that the emissions associated with this category fall well below a materiality threshold of 5%.

Use of sold products

22035

(7.8.3) Emissions calculation methodology

Select all that apply
☑ Methodology for direct use phase emissions, please specify :We multiply the product's idle and active energy ratings by their respective daily usage hours, sum these to get daily energy use (kWh), then multiply by 365 for annual use, and by the product's lifetime to get total lifetime energy use.

(7.8.4) Percentage of emissions calculated using data obtained from suppliers or value chain partners

0

(7.8.5) Please explain

Per product type, Dolby collects the power rating, lifetime energy use, average product lifetime, and the total quantity of product types sold by customer country for each reporting period. This allows Dolby to determine total energy use over the products' lifetime. Total energy use is then multiplied by the appropriate country-specific emission factor (MT CO2e/kWh consumed) to determine emission totals for the Use of Sold Products across Dolby's global sales. We leverage the appropriate emission factors from; the UK Defra / BEIS Conversion Factors for Company Reporting, AIB Residual Mix, EPA eGRID, IEA emission factors, Canada National Inventory Report (NIR), and Green-e residual mix.

End of life treatment of sold products

(7.22.4) Please explain

Dolby reports under operational control so we include our entire organization in our emissions reporting.

(7.23) Is your organization able to break down your emissions data for any of the subsidiaries included in your CDP response?

Select from:
☑ No

(7.29) What percentage of your total operational spend in the reporting year was on energy?

Select from:

☑ More than 0% but less than or equal to 5%

(7.30) Select which energy-related activities your organization has undertaken.

	Indicate whether your organization undertook this energy-related activity in the reporting year
Consumption of fuel (excluding feedstocks)	*Select from:* ☑ Yes
Consumption of purchased or acquired electricity	*Select from:* ☑ Yes
Consumption of purchased or acquired heat	*Select from:* ☑ No
Consumption of purchased or acquired steam	*Select from:* ☑ No
Consumption of purchased or acquired cooling	*Select from:* ☑ No
Generation of electricity, heat, steam, or cooling	*Select from:* ☑ Yes

(7.30.1) Report your organization's energy consumption totals (excluding feedstocks) in MWh.

Consumption of fuel (excluding feedstock)

(7.30.1.1) Heating value

Select from:

☑ HHV (higher heating value)

(7.30.1.2) MWh from renewable sources

0

(7.30.1.3) MWh from non-renewable sources

2837.23

(7.30.1.4) Total (renewable + non-renewable) MWh

2837.23

Consumption of purchased or acquired electricity

(7.30.1.1) Heating value

Select from:

☑ Unable to confirm heating value

(7.30.1.2) MWh from renewable sources

12026.46

(7.30.1.3) MWh from non-renewable sources

0

(7.30.1.4) Total (renewable + non-renewable) MWh

12026.46

Consumption of self-generated non-fuel renewable energy

(7.30.1.1) Heating value

Select from:
☑ Unable to confirm heating value

(7.30.1.2) MWh from renewable sources

695.5

(7.30.1.4) Total (renewable + non-renewable) MWh

695.50

Total energy consumption

(7.30.1.1) Heating value

Select from:
☑ Unable to confirm heating value

(7.30.1.2) MWh from renewable sources

12721.96

(7.30.1.3) MWh from non-renewable sources

2837.23

(7.30.1.4) Total (renewable + non-renewable) MWh

15559.19

(7.30.6) Select the applications of your organization's consumption of fuel.

	Indicate whether your organization undertakes this fuel application
Consumption of fuel for the generation of electricity	*Select from:* ☑ Yes
Consumption of fuel for the generation of heat	*Select from:* ☑ Yes
Consumption of fuel for the generation of steam	*Select from:* ☑ No
Consumption of fuel for the generation of cooling	*Select from:* ☑ No
Consumption of fuel for co-generation or tri-generation	*Select from:* ☑ No

(7.30.7) State how much fuel in MWh your organization has consumed (excluding feedstocks) by fuel type.

Sustainable biomass

(7.30.7.1) Heating value

Select from:
☑ Unable to confirm heating value

(7.30.7.2) Total fuel MWh consumed by the organization

0

(7.30.7.3) MWh fuel consumed for self-generation of electricity

0

(7.30.7.4) MWh fuel consumed for self-generation of heat

0

(7.30.7.8) Comment

Dolby does not consume any sustainable biomass.

Other biomass

(7.30.7.1) Heating value

Select from:
☑ Unable to confirm heating value

(7.30.7.2) Total fuel MWh consumed by the organization

0

(7.30.7.3) MWh fuel consumed for self-generation of electricity

0

(7.30.7.4) MWh fuel consumed for self-generation of heat

0

(7.30.7.8) Comment

Dolby does not consume any other biomass.

Other renewable fuels (e.g. renewable hydrogen)

(7.30.7.1) Heating value

Select from:
☑ Unable to confirm heating value

(7.30.7.2) Total fuel MWh consumed by the organization

0

(7.30.7.3) MWh fuel consumed for self-generation of electricity

0

(7.30.7.4) MWh fuel consumed for self-generation of heat

0

(7.30.7.8) Comment

Dolby does not consume any other renewable fuels.

Coal

(7.30.7.1) Heating value

Select from:
☑ Unable to confirm heating value

(7.30.7.2) Total fuel MWh consumed by the organization

0

(7.30.7.3) MWh fuel consumed for self-generation of electricity

0

(7.30.7.4) MWh fuel consumed for self-generation of heat

0

(7.30.7.8) Comment

Dolby does not consume coal.

Oil

(7.30.7.1) Heating value

Select from:
☑ HHV

(7.30.7.2) Total fuel MWh consumed by the organization

14.11

(7.30.7.3) MWh fuel consumed for self-generation of electricity

14.11

(7.30.7.4) MWh fuel consumed for self-generation of heat

0

(7.30.7.8) Comment

Dolby receives actual data on our diesel fuel consumption used at our 1275 Market office building (HQ), which is for emergency power generation. We are not aware at this time of additional consumption.

Gas

(7.30.7.1) Heating value

Select from:
☑ HHV

(7.30.7.2) Total fuel MWh consumed by the organization

2781.84

(7.30.7.3) MWh fuel consumed for self-generation of electricity

0

(7.30.7.4) MWh fuel consumed for self-generation of heat

2781.84

(7.30.7.8) Comment

Natural gas is used exclusively for space heating or food preparation.

Other non-renewable fuels (e.g. non-renewable hydrogen)

(7.30.7.1) Heating value

Select from:
☑ Unable to confirm heating value

(7.30.7.2) Total fuel MWh consumed by the organization

41.28

(7.30.7.3) MWh fuel consumed for self-generation of electricity

0

(7.30.7.4) MWh fuel consumed for self-generation of heat

0

(7.30.7.8) Comment

This references our gasoline consumption related to mobile fuel.

Total fuel

(7.30.7.1) Heating value

Select from:
☑ Unable to confirm heating value

(7.30.7.2) Total fuel MWh consumed by the organization

2837.23

(7.30.7.3) MWh fuel consumed for self-generation of electricity

(7.30.14.4) Low-carbon technology type

Select from:

☑ Solar

(7.30.14.5) Low-carbon energy consumed via selected sourcing method in the reporting year (MWh)

71

(7.30.14.6) Tracking instrument used

Select from:
☑ US-REC

(7.30.14.7) Country/area of origin (generation) of the low-carbon energy or energy attribute

Select from:
☑ United States of America

(7.30.14.8) Are you able to report the commissioning or re-powering year of the energy generation facility?

Select from:
☑ No

(7.30.14.10) Comment

The RECs for this co-location data center comply with Greenpeace's principles of locality, additionality, and sustainability, and were generated by Nevada Solar Farms.

Row 20

(7.30.14.1) Country/area

Select from:
☑ Germany

(7.30.14.2) Sourcing method

Select from:

☑ Unbundled procurement of energy attribute certificates (EACs)

(7.30.14.3) Energy carrier

Select from:
☑ Electricity

(7.30.14.4) Low-carbon technology type

Select from:
☑ Solar

(7.30.14.5) Low-carbon energy consumed via selected sourcing method in the reporting year (MWh)

51

(7.30.14.6) Tracking instrument used

Select from:
☑ GO

(7.30.14.7) Country/area of origin (generation) of the low-carbon energy or energy attribute

Select from:
☑ Portugal

(7.30.14.8) Are you able to report the commissioning or re-powering year of the energy generation facility?

Select from:
☑ Yes

(7.30.14.9) Commissioning year of the energy generation facility (e.g. date of first commercial operation or repowering)

2022

(7.30.14.10) Comment

For our global sites, Dolby purchases the appropriate renewable energy instruments for the country (or region when not available in country).

Row 21

(7.30.14.1) Country/area

Select from:
☑ Ireland

(7.30.14.2) Sourcing method

Select from:
☑ Unbundled procurement of energy attribute certificates (EACs)

(7.30.14.3) Energy carrier

Select from:
☑ Electricity

(7.30.14.4) Low-carbon technology type

Select from:
☑ Solar

(7.30.14.5) Low-carbon energy consumed via selected sourcing method in the reporting year (MWh)

23

(7.30.14.6) Tracking instrument used

Select from:
☑ GO

(7.30.14.7) Country/area of origin (generation) of the low-carbon energy or energy attribute

Select from:
☑ Portugal

(7.30.14.8) Are you able to report the commissioning or re-powering year of the energy generation facility?

Select from:
☑ Yes

(7.30.14.9) Commissioning year of the energy generation facility (e.g. date of first commercial operation or repowering)

2022

(7.30.14.10) Comment

For our global sites, Dolby purchases the appropriate renewable energy instruments for the country (or region when not available in country).

Row 22

(7.30.14.1) Country/area

Select from:
☑ Spain

(7.30.14.2) Sourcing method

Select from:
☑ Unbundled procurement of energy attribute certificates (EACs)

(7.30.14.3) Energy carrier

Select from:
☑ Electricity

(7.30.14.4) Low-carbon technology type

Select from:
☑ Solar

(7.30.14.5) Low-carbon energy consumed via selected sourcing method in the reporting year (MWh)

43

(7.30.14.6) Tracking instrument used

Select from:
☑ GO

(7.30.14.7) Country/area of origin (generation) of the low-carbon energy or energy attribute

Select from:
☑ Portugal

(7.30.14.8) Are you able to report the commissioning or re-powering year of the energy generation facility?

Select from:
☑ Yes

(7.30.14.9) Commissioning year of the energy generation facility (e.g. date of first commercial operation or repowering)

2022

(7.30.14.10) Comment

For our global sites, Dolby purchases the appropriate renewable energy instruments for the country (or region when not available in country).

Row 23

(7.30.14.1) Country/area

Select from:
☑ Sweden

(7.30.14.2) Sourcing method

Select from:
☑ Unbundled procurement of energy attribute certificates (EACs)

(7.30.14.3) Energy carrier

Select from:
☑ Electricity

(7.30.14.4) Low-carbon technology type

Select from:
☑ Solar

(7.30.14.5) Low-carbon energy consumed via selected sourcing method in the reporting year (MWh)

45

(7.30.14.6) Tracking instrument used

Select from:
☑ GO

(7.30.14.7) Country/area of origin (generation) of the low-carbon energy or energy attribute

Select from:
☑ Portugal

(7.30.14.8) Are you able to report the commissioning or re-powering year of the energy generation facility?

Select from:
☑ Yes

(7.30.14.9) Commissioning year of the energy generation facility (e.g. date of first commercial operation or repowering)

2022

(7.30.14.10) Comment

For our global sites, Dolby purchases the appropriate renewable energy instruments for the country (or region when not available in country).

Row 24

(7.30.14.1) Country/area

Select from:
☑ United Kingdom of Great Britain and Northern Ireland

(7.30.14.2) Sourcing method

Select from:
☑ Unbundled procurement of energy attribute certificates (EACs)

2080

(7.45.5) Scope 2 figure used

Select from:
☑ Market-based

(7.45.6) % change from previous year

28

(7.45.7) Direction of change

Select from:
☑ Decreased

(7.45.8) Reasons for change

Select all that apply

☑ Change in physical operating conditions

☑ Other, please specify :Decrease in full time equivalents (FTEs).

(7.45.9) Please explain

N/A

(7.53) Did you have an emissions target that was active in the reporting year?

Select all that apply

☑ Absolute target

☑ Intensity target

(7.53.1) Provide details of your absolute emissions targets and progress made against those targets.

Row 1

(7.53.1.1) Target reference number

Select from:

☑ Abs 1

(7.53.1.2) Is this a science-based target?

Select from:

☑ Yes, and this target has been approved by the Science Based Targets initiative

(7.53.1.3) Science Based Targets initiative official validation letter

Dolby - Target Validation Report.pdf

(7.53.1.4) Target ambition

Select from:

☑ 1.5°C aligned

(7.53.1.5) Date target was set

08/01/2023

(7.53.1.6) Target coverage

Select from:
☑ Organization-wide

(7.53.1.7) Greenhouse gases covered by target

Select all that apply

☑ Methane (CH4)   ☑ Sulphur hexafluoride (SF6)
☑ Nitrous oxide (N2O)   ☑ Nitrogen trifluoride (NF3)
☑ Carbon dioxide (CO2)
☑ Perfluorocarbons (PFCs)
☑ Hydrofluorocarbons (HFCs)

(7.53.1.8) Scopes

Select all that apply
☑ Scope 1
☑ Scope 2

(7.53.1.9) Scope 2 accounting method

Select from:
☑ Market-based

(7.53.1.11) End date of base year

09/27/2019

(7.53.1.12) Base year Scope 1 emissions covered by target (metric tons CO2e)

1401

(7.53.1.13) Base year Scope 2 emissions covered by target (metric tons CO2e)

3913

(7.53.1.31) Base year total Scope 3 emissions covered by target (metric tons CO2e)

0.000

(7.53.1.32) Total base year emissions covered by target in all selected Scopes (metric tons CO2e)

5314.000

(7.53.1.33) Base year Scope 1 emissions covered by target as % of total base year emissions in Scope 1

100

(7.53.1.34) Base year Scope 2 emissions covered by target as % of total base year emissions in Scope 2

100

(7.53.1.53) Base year emissions covered by target in all selected Scopes as % of total base year emissions in all selected Scopes

100

(7.53.1.54) End date of target

09/27/2030

(7.53.1.55) Targeted reduction from base year (%)

65

(7.53.1.56) Total emissions at end date of target covered by target in all selected Scopes (metric tons CO2e)

1859.900

(7.53.1.57) Scope 1 emissions in reporting year covered by target (metric tons CO2e)

651

(7.53.1.58) Scope 2 emissions in reporting year covered by target (metric tons CO2e)

0

(7.53.1.77) Total emissions in reporting year covered by target in all selected scopes (metric tons CO2e)

651.000

(7.53.1.78) Land-related emissions covered by target

Select from:
☑ No, it does not cover any land-related emissions (e.g. non-FLAG SBT)

(7.53.1.79) % of target achieved relative to base year

135.00

(7.53.1.80) Target status in reporting year

Select from:
☑ Achieved and maintained

(7.53.1.82) Explain target coverage and identify any exclusions

This target covers our entire operations and there are no exclusions. Many of our sites are leased office spaces so estimation is used to calculate energy consumption.

(7.53.1.83) Target objective

Dolby is working to lower our overall Scope 1 and 2 emissions by ensuring our operations are running as efficiently as possible. Additionally, we have a commitment to procure 100% renewable electricity annually and have been doing so since 2022.

(7.53.1.85) Target derived using a sectoral decarbonization approach

Select from:
☑ No

(7.53.1.86) List the emissions reduction initiatives which contributed most to achieving this target

We are committed to powering our global operations with 100% renewable energy. Where feasible, we have invested in direct solar and continue to work to reduce energy consumption across our offices.

(7.53.1.82) Explain target coverage and identify any exclusions

This target is company-wide and covers 100% of our Scope 3 emissions from FERA. This target progress is in alignment with SBTi methodology and therefore, excludes hotel stays and radiative forcing from our Business Travel Scope 3 emissions.

(7.53.1.83) Target objective

The absolute reduction target for FERA and business travel is ambitious as it is consistent with the level of decarbonization required to keep global temperature increase to well below 2°C compared to pre-industrial temperatures. Dolby is identifying energy efficiency and renewable electricity opportunities to help achieve the Scope 3 FERA absolute emission reduction target. Dolby has also seen significant reductions to business travel due to the impact of COVID-19 with travel expected to increase moving forward, but we are making changes to business travel policies to promote sustainable business travel and to be consistent with a well below 2°C future from base year emissions.

(7.53.1.85) Target derived using a sectoral decarbonization approach

Select from:

☑ No

(7.53.1.86) List the emissions reduction initiatives which contributed most to achieving this target

Dolby has achieved and maintained this target by addressing demand through prioritizing travel that aligns with business imperatives encouraging use of airlines committed to sustainability and implementing tools and features to provide visibility on the carbon impacts of travel for our employees and advocating for change within the travel industry. We are actively working to educate our employees around sustainable travel and making changes to business travel policies to be consistent with a well-below 2°C future from base year emissions.

(7.53.2.83) Target status in reporting year

Select from:
☑ Underway

(7.53.2.85) Explain target coverage and identify any exclusions

This target includes emissions from the lifetime energy use of Dolby's sold products and is derived from the total number of products sold in the fiscal year. The products under the intensity target include servers, amplifiers, and audio processors. This target progress is in alignment with SBTi methodology and therefore excludes indirect energy use.

(7.53.2.86) Target objective

The product use intensity reduction target is ambitious as the Dolby product use intensity has already been decreasing, and sales of products are projected to grow by the target year. Dolby engineers are working on various energy efficiency measures for current servers and other products and incorporating sustainability criteria into their decision-making for future products and services.

(7.53.2.87) Plan for achieving target, and progress made to the end of the reporting year

Dolby's Cinema team has completed calculations to identify product efficiency opportunities. Specifically, we will be able to achieve this target by increasing energy efficiency for recent audio processors and future servers.

Dolby - Target Validation Report.pdf

(7.54.1.19) Explain target coverage and identify any exclusions

We are committed to powering 100% of our global operations with renewable energy. In FY24, we achieved this for the third consecutive year. This target is part of our absolute Scope 1 & 2 emissions reduction target (Abs 1).

(7.54.1.20) Target objective

We aim to procure renewable electricity at the site level wherever possible. Where it is not available, we purchase unbundled, third-party verified energy attribute certificates (EACs) to cover the non-renewable electricity used in that country (or region when in-country renewable energy instruments are not available). In FY24, we achieved 100% renewable electricity globally for the third consecutive year.

(7.54.1.22) List the actions which contributed most to achieving this target

We aim to procure renewable electricity at the site level wherever possible. Where it is not available, we purchase unbundled, third-party verified energy attribute certificates (EACs) to cover the non-renewable electricity used in that country (or region when in-country renewable energy instruments are not available). Our largest electricity consuming sites (San Francisco and Sunnyvale, California) are both part of community choice aggregation programs and are fully powered by solar and wind energy. Currently, our solar installation in Sunnyvale generates approximately 46% of the site's electrical load. Additionally, we are installing battery storage to enhance business resiliency against power outages and other emergency situations.

☑ Science Based Targets initiative – approved supplier engagement target

(7.54.2.17) Science Based Targets initiative official validation letter

Dolby - Target Validation Report.pdf

(7.54.2.18) Please explain target coverage and identify any exclusions

This target commits Dolby to work towards the goal of having 58% of its suppliers (by emissions) set science-based targets (SBTs) by the end of calendar year 2027. This target is company-wide and there are no exclusions.

(7.54.2.19) Target objective

Upstream supplier emissions from PG&S and Capital Goods represent a high percentage of our total Scope 3 emissions, which we can most effectively manage through supplier engagement. By targeting the top 58% of suppliers by emissions and having them set science-based targets, we will address our largest suppliers by their emissions contribution. In addition, by pushing these suppliers to set targets, they will reduce emissions relevant to Dolby and for their own organization, leading to an outsized emissions reduction beyond their contributions to Dolby's Scope 3 footprint.

(7.54.2.20) Plan for achieving target, and progress made to the end of the reporting year

We are aiming to achieve this target by collaborating with teams across the company – Sustainability, Procurement, Cinema, etc. – to develop a robust supplier engagement program. Through this engagement, we will provide education and resources to support our suppliers in furthering their own sustainability journeys, and specifically, setting their own SBTs. In 2023, we launched our supplier engagement initiative and have engaged with over 60% of our suppliers (by emissions). By supporting these suppliers to set targets, they will reduce emissions relevant to Dolby and to their own organizations, leading to an outsized emissions reduction beyond their contribution.

(7.55) Did you have emissions reduction initiatives that were active within the reporting year? Note that this can include those in the planning and/or implementation phases.

Select from:
☑ Yes

(7.55.1) Identify the total number of initiatives at each stage of development, and for those in the implementation stages, the estimated CO2e savings.

	Number of initiatives	Total estimated annual CO2e savings in metric tonnes CO2e
Under investigation	0	`Numeric input
To be implemented	0	0
Implementation commenced	2	28
Implemented	1	230
Not to be implemented	0	`Numeric input

(7.55.2) Provide details on the initiatives implemented in the reporting year in the table below.

Row 1

(7.55.2.1) Initiative category & Initiative type

Low-carbon energy generation
☑ Solar PV

(7.55.2.2) Estimated annual CO2e savings (metric tonnes CO2e)

230

(7.55.2.3) Scope(s) or Scope 3 category(ies) where emissions savings occur

Select all that apply
☑ Scope 2 (location-based)
☑ Scope 2 (market-based)

(7.55.2.4) Voluntary/Mandatory

Select from:
☑ Voluntary

(7.55.2.5) Annual monetary savings (unit currency – as specified in 1.2)

140000

(7.55.2.6) Investment required (unit currency – as specified in 1.2)

1300000

(7.55.2.7) Payback period

Select from:
☑ 4-10 years

(7.55.2.8) Estimated lifetime of the initiative

Select from:
☑ 21-30 years

(7.55.2.9) Comment

Annual monetary savings and annual CO2e savings are estimates.

(7.55.3) What methods do you use to drive investment in emissions reduction activities?

Row 1

(7.55.3.1) Method

Select from:

☑ Compliance with regulatory requirements/standards

(7.55.3.2) Comment

Projects that are required by law and regulation are funded either through the annual budget process or on an emergent basis. The Facilities team looks at compliance requirements on a project-by-project basis and works with our service providers to scope projects to address any changes in laws and regulations. Additionally, all projects are designed and scoped to ensure compliance with Title 24 (in California) and all other applicable laws and regulations. The Facilities team is constantly working to drive energy efficiency across our built environment and undertakes projects each year to implement the latest best practices and/or new technologies to reduce energy consumption. The Facilities team also manages projects such as our solar installation at our office building in Sunnyvale, California, which is an example of a project with a dedicated budget to support emissions reductions.

Row 2

(7.55.3.1) Method

Select from:

☑ Dedicated budget for energy efficiency

(7.55.3.2) Comment

Energy efficiency and other emissions reduction projects are recommended by our Facilities team and approved as part of our annual budgeting process. The Facilities team develops, scopes, and prices the projects, and then seeks funding for them. The project ideas and plans are developed through our efforts. The Facilities team is constantly working to drive energy efficiency across our built environment and undertakes projects each year to implement the latest best practices and/or new technologies to reduce energy consumption. The Facilities team also manages projects such as our additional solar installation at our office building in Sunnyvale, California, which is an example of a project with a dedicated budget to support emissions reductions.

Row 3

(7.55.3.1) Method

Select from:
☑ Internal incentives/recognition programs

(7.55.3.2) Comment

Dolby encourages mass transportation and alternative commuting, including expanded bike lockers/shower facilities at our buildings (where possible) and bike leasing programs in select locations to encourage bicycle commuting. Additionally, in certain locations, Dolby provides monetary subsidies, allowances, and/or pre-tax programs to employees who participate in mass transit commuting. Additionally, Dolby promotes the use of electric vehicles (EVs). Dolby provides free EV charging stations at our owned office buildings in San Francisco, Sunnyvale, and Burbank, California. Along with supporting the transition to electric vehicles, this incentive specifically reduces emissions related to Scope 3, Category 7: Employee Commuting.

Row 4

(7.55.3.1) Method

Select from:
☑ Employee engagement

(7.55.3.2) Comment

At Dolby, we leverage employee engagement to drive investment in emission reduction activities. Our strategy involves two key initiatives: Earth Month and Dolby Cares Month. During Earth Month, we conduct targeted educational and informational webinars to raise awareness about the environmental impact of Dolby as well as individual actions, both in the workplace and at home. These webinars provide practical guidance on reducing personal carbon footprints, as well as other sustainability-related issues. Dolby Cares Month, our corporate volunteering program, encourages employees to participate in local community projects. While the nature of these projects varies globally, we prioritize environmental initiatives that contribute to emission reductions, such as tree planting and renewable energy projects. This approach not only educates our workforce but also provides hands-on opportunities for environmental stewardship, fostering a company-wide culture of sustainability and demonstrating our commitment to global climate action and reducing overall emissions.

(7.74) Do you classify any of your existing goods and/or services as low-carbon products?

Select from:
☑ No

(7.79) Has your organization retired any project-based carbon credits within the reporting year?

Select from:
☑ Yes

(7.79.1) Provide details of the project-based carbon credits retired by your organization in the reporting year.

☑ Afforestation

(7.79.1.2) Type of mitigation activity

Select from:
☑ Carbon removal

(7.79.1.3) Project description

The project's name and ID as specified by the carbon-crediting program it is a part of: Reforestation of Degraded Forest Reserves in Ghana, ID: VCS987

The methodology used by the project: AR-AM0003

The geographic location of the project: Ghana

Challenge

Ghana's tree cover has decreased 19% since 2000 per Global Forest Watch. The project areas have been degraded due to overexploitation, bush fires and conversion to agriculture. The nation's economy depends on climate sensitive-sectors such as agriculture, energy, and forestry.

Solution

This project engages local farmers to plant trees and grow crops, via intercropping, on degraded lands. Tree planting includes a mix of teak and indigenous trees following the principles of the Forest Stewardship Council (FSC). Additionally, water infrastructure has been installed in the local villages to engage communities.

Impact

In addition to delivering emission removals, over 1,000 jobs have been created, and more than 6,000 hectares of project land is available to local farmers for intercropping. 40% of jobs created to be filled by women and 25% of the available areas for intercropping to be allocated to female farmers.

Select from:

☑ Other, please specify :Improved Forest Management

(7.79.1.2) Type of mitigation activity

Select from:

☑ Carbon removal

(7.79.1.3) Project description

The project's name and ID as specified by the carbon-crediting program it is a part of: Anew - Boone Forestry Project, ID: ACR596

The methodology used by the project: Improved Forest Management (IFM) on Non-Federal U.S. Forestlands

The geographic location of the project: United States

Challenge

The Boone IFM project spans nearly 17,000 hectares in the state of Kentucky which sits in one of the most biodiverse regions of North America with steep, forested slopes and narrow valleys. Industrial private lands in the region use aggressively short-term rotation cycles, which can mean clearcut harvesting.

Solution

By committing to maintain forest carbon stocks above the regional baseline level and to reduce harvesting levels below annual growth rates, the project delivers carbon reductions and removals. The forest in the project areas is a mix of hardwoods, especially yellow poplar and chestnut oak.

Impact

This project fosters sustainable, natural forest growth, wildlife habitat and forest health. The project ensures long-term sustainable management of the forests, which could otherwise undergo significant commercial timber harvesting. The southern Appalachia region is home to important North American biodiversity such as elk, deer and black bears.

ACR requires all Project Proponents to prepare and disclose an environmental and social impact assessment, mitigation of any negative impacts, and monitoring of any negative impacts and risks. ACR requires the use of the most recently published ACR Environmental and Social Impact Assessment Report template on the ACR website, provided within or as an appendix to the GHG Project Plan, for the assessment of environmental and social impacts of the Project, taking into account the scope and scale of the project activity and the mitigation measures.

(7.79.1.14) Please explain

The serial numbers of the credits canceled from this project and cancelation date: 130 tonnes (03 July 2025) - ACR-US-596-2021-1940-11829 to 11958 1,370 tonnes (03 July 2025) - ACR-US-596-2021-1941-1 to 1370 Corresponding adjustments have not been issued for these carbon credits. Dolby works with trusted partners to select high-quality, third-party verified carbon offset projects, including a combination of avoidance and removal projects. We aim to have a balanced portfolio of projects that support nature, sustainable infrastructure, health, and livelihoods in alignment with the UN's Sustainable Development Goals.

Row 3

(7.79.1.1) Project type

Select from:

☑ Energy efficiency: households

(7.79.1.2) Type of mitigation activity

Select from:

☑ Emissions reduction

(7.79.1.3) Project description

The project's name and ID as specified by the carbon-crediting program it is a part of Aqua Clara Safe Water Program: , ID: GS11169

The methodology used by the project: GS Methodology for emission reductions from safe drinking water supply

The geographic location of the project: Kenya

Challenge

Half of all Kenyans do not have access to safe drinking water, often collecting water from rivers or streams and then boiling to purify. Boiling water each time before drinking reduces forest cover, causes carbon emissions, and exposes people to harmful smoke.

Solution

This project brings families and schools in Kenya affordable clean water options such as bio-sand filters to purify water as it passes through layers of sand, removing bacteria and parasites from the clean water that flows from the tap.

Impact

Improved health and wellbeing from reduced exposure to unsafe water and household smoke. Beyond sharing the tools for safe water, Aqua Clara also shares the knowledge of how to maintain the bio-sand filters and the importance of washing hands and fresh foods.

(7.79.1.4) Credits retired by your organization from this project in the reporting year (metric tons CO2e)

3200

(7.79.1.5) Purpose of retirement

(7.79.1.13) Provide details of other issues the selected program requires projects to address

Gold Standard requires all projects to meet the following principles underlying the Gold Standard for the Global Goals: 1. Contribution to Climate Security and Sustainable Development 2. Safeguarding Principles: Projects shall conduct a Safeguarding Principles Assessment and conform to Gold Standard Safeguarding Principles and Requirements 3. Stakeholder Inclusivity: Projects shall identify and engage Relevant Stakeholders and seek Expert Stakeholder input where necessary in the design, planning and implementation of the Project. Project design shall reflect the views and inputs of stakeholders and ongoing feedback shall be sought, captured and acted upon throughout the life of the Project 4. Demonstration of real outcomes 5. Financial Additionality and Ongoing Financial Need: All Projects must demonstrate impacts that are additional as compared to their baseline scenario

(7.79.1.14) Please explain

The serial numbers of the credits canceled from this project and cancelation date: 3,200 tonnes (01 July 2025) - GS1-1-KE-GS11169-16-2023-27905-8580-11779. Corresponding adjustments have not been issued for these carbon credits. Climate Impact Partners' standard process implies a due diligence screening and QA report. Dolby works with trusted partners to select high-quality, third-party verified carbon offset projects, including a combination of avoidance and removal projects. We aim to have a balanced portfolio of projects that support nature, sustainable infrastructure, health, and livelihoods in alignment with the UN's Sustainable Development Goals.

Row 4

(7.79.1.1) Project type

Select from:
☑ Clean cookstove distribution

(7.79.1.2) Type of mitigation activity

Select from:
☑ Emissions reduction

(7.79.1.3) Project description

The project's name and ID as specified by the carbon-crediting program it is a part of: GHG Emission reduction through the use of Bondhu Chula (Improved Cook Stoves) in Bangladesh POA, ID: GS3112

The methodology used by the project: GS MS Simplified Methodology for Efficient Cookstoves

The geographic location of the project: Bangladesh

Challenge

Only one in five of the 160+ million people in Bangladesh have access to clean cooking technology. Cooking is mostly done over an open firepit, releasing smoke and particulate pollutants, causing millions in the country to suffer from lung or eye infections.

Solution

Bondhu Chula means friendly stove and is designed with a chimney to burn more efficiently and to take harmful smoke and pollutants out of the house. Carbon finance subsidizes the cost of the stove for end users and funds training programs for local entrepreneurs to learn how to make and install the stoves.

Impact

Millions of stoves have already been installed, reducing fuel use by up to 50% and saving money for each family. This project is creating a market for efficient stoves in Bangladesh, involving thousands of entrepreneurs in manufacturing and distribution networks.

C9. Environmental performance - Water security

(9.1) Are there any exclusions from your disclosure of water-related data?

Select from:
☑ Yes

(9.1.1) Provide details on these exclusions.

Row 1

(9.1.1.1) Exclusion

Select from:
☑ Facilities

(9.1.1.2) Description of exclusion

Many of our sites are small, leased offices and no utility information is available.

(9.1.1.3) Reason for exclusion

Select from:
☑ Data is not available

(9.1.1.4) Primary reason why data is not available

Select from:
☑ Challenges associated with data collection and/or quality

(9.1.1.7) Percentage of water volume the exclusion represents

Select from:
☑ 41-50%

(9.1.1.8) Please explain

Many of Dolby's offices are in leased buildings with relatively few employees. Some offices have fewer than 5 employees. Many of these leased buildings are not sub metered and the landlords are unable to provide individual utility bills to the tenants of their buildings. Additionally, as a company with 93% of its revenue coming from technology licensing arrangements and no direct manufacturing, water is not a material issue for Dolby; however, we do work to conserve water at our offices around the world.

(9.2) Across all your operations, what proportion of the following water aspects are regularly measured and monitored?

Water withdrawals – total volumes

(9.2.1) % of sites/facilities/operations

Select from:
☑ 51-75

(9.2.2) Frequency of measurement

Select from:
☑ Yearly

(9.2.3) Method of measurement

Any Dolby site where we can get actual water data we report and track.

(9.2.4) Please explain

As a company with 93% of its revenue coming from technology licensing arrangements and no direct manufacturing, water is not a material issue for Dolby; however, we recognize the importance of water conservation and work to conserve water at our corporate offices around the world.

Water withdrawals – volumes by source

(9.2.1) % of sites/facilities/operations

Select from:
☑ Not relevant

(9.2.4) Please explain

As a company with 93% of its revenue coming from technology licensing arrangements and no direct manufacturing, water is not a material issue for Dolby; however, we recognize the importance of water conservation and work to conserve water at our corporate offices around the world.

Water withdrawals quality

(9.2.1) % of sites/facilities/operations

Select from:
☑ Not relevant

(9.2.4) Please explain

As a company with 93% of its revenue coming from technology licensing arrangements and no direct manufacturing, water is not a material issue for Dolby; however, we recognize the importance of water conservation and work to conserve water at our corporate offices around the world.

Water discharges – total volumes

(9.2.1) % of sites/facilities/operations

Select from:
☑ 51-75

(9.2.2) Frequency of measurement

Select from:
☑ Yearly

(9.2.3) Method of measurement

Any Dolby site where we can get actual water data we report and track.

(9.2.4) Please explain

As a company with 93% of its revenue coming from technology licensing arrangements and no direct manufacturing, water is not a material issue for Dolby; however, we recognize the importance of water conservation and work to conserve water at our corporate offices around the world.

Water discharges – volumes by destination

(9.2.1) % of sites/facilities/operations

Select from:
☑ Not relevant

(9.2.4) Please explain

As a company with 93% of its revenue coming from technology licensing arrangements and no direct manufacturing, water is not a material issue for Dolby; however, we recognize the importance of water conservation and work to conserve water at our corporate offices around the world.

Water discharges – volumes by treatment method

(9.2.1) % of sites/facilities/operations

Select from:
☑ Not relevant

(9.2.4) Please explain

As a company with 93% of its revenue coming from technology licensing arrangements and no direct manufacturing, water is not a material issue for Dolby; however, we recognize the importance of water conservation and work to conserve water at our corporate offices around the world.

Water discharge quality – by standard effluent parameters

(9.2.1) % of sites/facilities/operations

(9.2.4) Please explain

As a company with 93% of its revenue coming from technology licensing arrangements and no direct manufacturing, water is not a material issue for Dolby; however, we recognize the importance of water conservation and work to conserve water at our corporate offices around the world.

Water discharge quality – emissions to water (nitrates, phosphates, pesticides, and/or other priority substances)

(9.2.1) % of sites/facilities/operations

Select from:
☑ Not relevant

(9.2.4) Please explain

As a company with 93% of its revenue coming from technology licensing arrangements and no direct manufacturing, water is not a material issue for Dolby; however, we recognize the importance of water conservation and work to conserve water at our corporate offices around the world.

Water discharge quality – temperature

(9.2.1) % of sites/facilities/operations

Select from:
☑ Not relevant

(9.2.4) Please explain

As a company with 93% of its revenue coming from technology licensing arrangements and no direct manufacturing, water is not a material issue for Dolby; however, we recognize the importance of water conservation and work to conserve water at our corporate offices around the world.

Water consumption – total volume

(9.2.1) % of sites/facilities/operations

Select from:
☑ 51-75

(9.2.2) Frequency of measurement

Select from:
☑ Yearly

(9.2.3) Method of measurement

Any Dolby site where we can get water data from the local utility we report and track our water data.

(9.2.4) Please explain

As a company with 93% of its revenue coming from technology licensing arrangements and no direct manufacturing, water is not a material issue for Dolby; however, we recognize the importance of water conservation and work to conserve water at our corporate offices around the world.

Water recycled/reused

(9.2.1) % of sites/facilities/operations

Select from:
☑ Not relevant

(9.2.4) Please explain

As a company with 93% of its revenue coming from technology licensing arrangements and no direct manufacturing, water is not a material issue for Dolby; however, we recognize the importance of water conservation and work to conserve water at our corporate offices around the world.

The provision of fully-functioning, safely managed WASH services to all workers

(9.2.1) % of sites/facilities/operations

(9.2.4) Please explain

As a company with 93% of its revenue coming from technology licensing arrangements and no direct manufacturing, water is not a material issue for Dolby; however, we recognize the importance of water conservation and work to conserve water at our corporate offices around the world.

(9.2.2) What are the total volumes of water withdrawn, discharged, and consumed across all your operations, how do they compare to the previous reporting year, and how are they forecasted to change?

Total withdrawals

(9.2.2.1) Volume (megaliters/year)

18.2

(9.2.2.2) Comparison with previous reporting year

Select from:
☑ About the same

(9.2.2.3) Primary reason for comparison with previous reporting year

Select from:
☑ Unknown

(9.2.2.4) Five-year forecast

Select from:
☑ About the same

(9.2.2.5) Primary reason for forecast

Select from:
☑ Unknown

(9.2.2.6) Please explain

We have observed similar water usage in FY23 and FY24.

Total discharges

(9.2.2.1) Volume (megaliters/year)

14.6

(9.2.2.2) Comparison with previous reporting year

Select from:
☑ Lower

(9.2.2.3) Primary reason for comparison with previous reporting year

Select from:
☑ Change in accounting methodology

(9.2.2.4) Five-year forecast

Select from:
☑ About the same

(9.2.2.5) Primary reason for forecast

Select from:
☑ Unknown

(9.2.2.6) Please explain

While our total water withdrawals remained relatively consistent between FY23 and FY24, our reported discharge volumes decreased. This change is due to a refinement in our methodology: in previous years, we applied a uniform discharge rate to the total volume of water withdrawn, which included categories not typically discharged (e.g., irrigation). In FY24, we improved our accounting by excluding these non-discharged water categories from the discharge calculation, resulting in a more accurate and lower reported discharge volume.

Total consumption

(9.2.2.1) Volume (megaliters/year)

3.6

(9.2.2.2) Comparison with previous reporting year

Select from:
☑ Higher

(9.2.2.3) Primary reason for comparison with previous reporting year

Select from:
☑ Change in accounting methodology

(9.2.2.4) Five-year forecast

Select from:
☑ About the same

(9.2.2.5) Primary reason for forecast

Select from:
☑ Unknown

(9.2.2.6) Please explain

With the lower total discharge amount, due to methodology changes, the consumption increased.

(9.2.4) Indicate whether water is withdrawn from areas with water stress, provide the volume, how it compares with the previous reporting year, and how it is forecasted to change.

(9.2.4.1) Withdrawals are from areas with water stress

Select from:
☑ Yes

(9.2.4.2) Volume withdrawn from areas with water stress (megaliters)

1.3

(9.2.4.3) Comparison with previous reporting year

Select from:
☑ About the same

(9.2.4.4) Primary reason for comparison with previous reporting year

Select from:
☑ Other, please specify: While not deemed a material issue, we do monitor areas where we are located with water stress on an annual basis.

(9.2.4.5) Five-year forecast

Select from:
☑ About the same

(9.2.4.6) Primary reason for forecast

Select from:
☑ Other, please specify: We don't anticipate any significant operational changes in the next few years.

(9.2.4.7) % of total withdrawals that are withdrawn from areas with water stress

7.14

Select all that apply
☑ WRI Aqueduct

(9.2.4.9) Please explain

This volume is based on sites where we get actual water consumption data (53% coverage of our portfolio). Many of our offices are leased office spaces and actual data is not available.

(9.3) In your direct operations and upstream value chain, what is the number of facilities where you have identified substantive water-related dependencies, impacts, risks, and opportunities?

Direct operations

(9.3.1) Identification of facilities in the value chain stage

Select from:
☑ Yes, we have assessed this value chain stage and identified facilities with water-related dependencies, impacts, risks, and opportunities

(9.3.2) Total number of facilities identified

6

(9.3.3) % of facilities in direct operations that this represents

Select from:
☑ 1-25

(9.3.4) Please explain

This percentage is based on the sites where we have actual data that withdraw and consume water in locations with high or extremely high baseline water stress.

Upstream value chain

Select from:
☑ No, we have not assessed this value chain stage for facilities with water-related dependencies, impacts, risks, and opportunities, and are not planning to do so in the next 2 years

(9.3.4) Please explain

As a company with 93% of its revenue coming from technology licensing arrangements and no direct manufacturing, water is not a material issue for Dolby; however, we recognize the importance of water conservation and work to conserve water at our corporate offices around the world. For this reason, we have not undergone an analysis on water-related dependencies, impacts, risks, and opportunities for our upstream value chain.

(9.3.1.28) Comparison of total consumption with previous reporting year

Select from:
☑ This is our first year of measurement

(9.3.1.29) Please explain

WRI's Aqueduct Water Risk Atlas was used to assess the risk level.

(9.3.2) For the facilities in your direct operations referenced in 9.3.1, what proportion of water accounting data has been third party verified?

Water withdrawals – total volumes

(9.3.2.1) % verified

Select from:
☑ Not verified

(9.3.2.3) Please explain

As a company with 93% of its revenue coming from technology licensing arrangements and no direct manufacturing, water is not a material issue for Dolby; however, we recognize the importance of water conservation and work to conserve water at our corporate offices around the world.

Water withdrawals – volume by source

(9.3.2.1) % verified

Select from:
☑ Not relevant

(9.3.2.3) Please explain

As a company with 93% of its revenue coming from technology licensing arrangements and no direct manufacturing, water is not a material issue for Dolby; however, we recognize the importance of water conservation and work to conserve water at our corporate offices around the world.

Water withdrawals – quality by standard water quality parameters

(9.3.2.1) % verified

Select from:
☑ Not relevant

(9.3.2.3) Please explain

As a company with 93% of its revenue coming from technology licensing arrangements and no direct manufacturing, water is not a material issue for Dolby; however, we recognize the importance of water conservation and work to conserve water at our corporate offices around the world.

Water discharges – total volumes

(9.3.2.1) % verified

Select from:
☑ Not verified

(9.3.2.3) Please explain

As a company with 93% of its revenue coming from technology licensing arrangements and no direct manufacturing, water is not a material issue for Dolby; however, we recognize the importance of water conservation and work to conserve water at our corporate offices around the world.

Water discharges – volume by destination

(9.3.2.1) % verified

Select from:
☑ Not relevant

(9.3.2.3) Please explain

As a company with 93% of its revenue coming from technology licensing arrangements and no direct manufacturing, water is not a material issue for Dolby; however, we recognize the importance of water conservation and work to conserve water at our corporate offices around the world.

Water discharges – volume by final treatment level

(9.3.2.1) % verified

Select from:
☑ Not relevant

(9.3.2.3) Please explain

As a company with 93% of its revenue coming from technology licensing arrangements and no direct manufacturing, water is not a material issue for Dolby; however, we recognize the importance of water conservation and work to conserve water at our corporate offices around the world.

Water discharges – quality by standard water quality parameters

(9.3.2.1) % verified

Select from:
☑ Not relevant

(9.3.2.3) Please explain

As a company with 93% of its revenue coming from technology licensing arrangements and no direct manufacturing, water is not a material issue for Dolby; however, we recognize the importance of water conservation and work to conserve water at our corporate offices around the world.

Water consumption – total volume

(9.3.2.1) % verified

Select from:

☑ Not verified

(9.3.2.3) Please explain

As a company with 93% of its revenue coming from technology licensing arrangements and no direct manufacturing, water is not a material issue for Dolby; however, we recognize the importance of water conservation and work to conserve water at our corporate offices around the world.

(9.5) Provide a figure for your organization's total water withdrawal efficiency.

	Revenue (currency)	Total water withdrawal efficiency	Anticipated forward trend
	$1,273,721,000	69984670.33	Not Monitored.

(9.13) Do any of your products contain substances classified as hazardous by a regulatory authority?

	Products contain hazardous substances
	Select from: ☑ Yes

(9.13.1) What percentage of your company's revenue is associated with products containing substances classified as hazardous by a regulatory authority?

(9.13.1.1) Regulatory classification of hazardous substances

Select from:
☑ Candidate List of Substances of Very High Concern for Authorisation above 0.1% by weight (EU Regulation)

(9.13.1.2) % of revenue associated with products containing substances in this list

Select from:
☑ Less than 10%

(9.13.1.3) Please explain

As a company with 93% of its revenue coming from technology licensing arrangements and no direct manufacturing, hazardous substances are not a material issue for Dolby; however, we recognize the importance and responsibility around hazardous substances. 7% of Dolby's revenue is associated with other products and services.

(9.14) Do you classify any of your current products and/or services as low water impact?

(9.14.1) Products and/or services classified as low water impact

Select from:

☑ No, and we do not plan to address this within the next two years

(9.14.3) Primary reason for not classifying any of your current products and/or services as low water impact

Select from:

☑ Important but not an immediate business priority

(9.14.4) Please explain

As a company with 93% of its revenue coming from technology licensing arrangements and no direct manufacturing, water is not a material issue for Dolby; however, we recognize the importance of water conservation and work to conserve water at our corporate offices around the world.

(9.15) Do you have any water-related targets?

Select from:

☑ No, and we do not plan to within the next two years

(9.15.3) Why do you not have water-related target(s) and what are your plans to develop these in the future?

(9.15.3.1) Primary reason

Select from:

☑ Important but not an immediate business priority

(9.15.3.2) Please explain

At this time, Dolby does not have plans to develop water related targets. This is due to the fact that 93% of our revenue comes from technology licensing arrangements and no direct manufacturing, therefore water is not a material issue for Dolby; however, we do work to conserve water at our offices around the world and disclose our water consumption annually.

C11. Environmental performance - Biodiversity

(11.2) What actions has your organization taken in the reporting year to progress your biodiversity-related commitments?

	Actions taken in the reporting period to progress your biodiversity-related commitments
	Select from: ☑ No, and we do not plan to undertake any biodiversity-related actions

(11.3) Does your organization use biodiversity indicators to monitor performance across its activities?

	Does your organization use indicators to monitor biodiversity performance?
	Select from: ☑ No

(11.4) Does your organization have activities located in or near to areas important for biodiversity in the reporting year?

	Indicate whether any of your organization's activities are located in or near to this type of area important for biodiversity	Comment
Legally protected areas	*Select from:* ☑ No	N/A
UNESCO World Heritage sites	*Select from:* ☑ No	N/A
UNESCO Man and the Biosphere Reserves	*Select from:* ☑ No	N/A
Ramsar sites	*Select from:* ☑ No	N/A
Key Biodiversity Areas	*Select from:* ☑ No	N/A
Other areas important for biodiversity	*Select from:* ☑ No	N/A

C13. Further information & sign off

(13.1) Indicate if any environmental information included in your CDP response (not already reported in 7.9.1/2/3, 8.9.1/2/3/4, and 9.3.2) is verified and/or assured by a third party?

	Other environmental information included in your CDP response is verified and/or assured by a third party
	Select from: ☑ Yes

(13.1.1) Which data points within your CDP response are verified and/or assured by a third party, and which standards were used?

Row 1

(13.1.1.1) Environmental issue for which data has been verified and/or assured

Select all that apply
☑ Climate change

(13.1.1.2) Disclosure module and data verified and/or assured

Environmental performance – Climate change
☑ Renewable Electricity/Steam/Heat/Cooling consumption

(13.1.1.3) Verification/assurance standard

Climate change-related standards
☑ ISO 14064-3

(13.1.1.4) Further details of the third-party verification/assurance process

For the second consecutive year, Dolby received limited assurance of its 100% renewable electricity claim, which is completed through a combination of direct generation, green tariffs, and renewable electricity instruments.

(13.1.1.5) Attach verification/assurance evidence/report (optional)

Dolby 2024 GHG Verification Statement.pdf

(13.2) Use this field to provide any additional information or context that you feel is relevant to your organization's response. Please note that this field is optional and is not scored.

(13.2.1) Additional information

Dolby's decades of innovation in sight and sound have positioned us to shape the future of entertainment. Our environmental, social, and governance (ESG) initiatives are helping us continue to enable artists, storytellers, and brands loved by consumers to deliver immersive audiovisual experiences, reliably and sustainably. Our approach is built on measurable actions and outcomes that support both our business objectives and our responsibilities as a corporate citizen.
